INTRODUCTION

Doing Business sheds light on how easy or difficult it is for a local entrepreneur to open and run a small to medium-size business when complying with relevant regulations. It measures and tracks changes in regulations affecting 11 areas in the life cycle of a business: starting a business, dealing with construction permits, getting electricity, registering property, getting credit, protecting minority investors, paying taxes, trading across borders, enforcing contracts, resolving insolvency and labor market regulation.

In a series of annual reports *Doing Business* presents quantitative indicators on business regulations and the protection of property rights that can be compared across 189 economies, from Afghanistan to Zimbabwe, over time. The data set covers 47 economies in Sub-Saharan Africa, 32 in Latin America and the Caribbean, 25 in East Asia and the Pacific, 26 in Eastern Europe and Central Asia, 20 in the Middle East and North Africa and 8 in South Asia, as well as 31 OECD high-income economies. The indicators are used to analyze economic outcomes and identify what reforms have worked, where and why.

This economy profile presents the *Doing Business* indicators for Russian Federation. To allow useful comparison, it also provides data for other selected economies (comparator economies) for each indicator. The data in this report are current as of June

1, 2014 (except for the paying taxes indicators, which cover the period January–December 2013).

The *Doing Business* methodology has limitations. Other areas important to business—such as an economy's proximity to large markets, the quality of its infrastructure services (other than those related to trading across borders and getting electricity), the security of property from theft and looting, the transparency of government procurement, macroeconomic conditions or the underlying strength of institutions—are not directly studied by *Doing Business*. The indicators refer to a specific type of business, generally a local limited liability company operating in the largest business city. Because standard assumptions are used in the data collection, comparisons and benchmarks are valid across economies. The data not only highlight the extent of obstacles to doing business; they also help identify the source of those obstacles, supporting policy makers in designing regulatory reform.

More information is available in the full report. *Doing Business 2015* presents the indicators, analyzes their relationship with economic outcomes and presents business regulatory reforms. The data, along with information on ordering *Doing Business 2015*, are available on the *Doing Business* website at <http://www.doingbusiness.org>.

CHANGES IN *DOING BUSINESS 2015*

As part of a 2-year update in methodology, *Doing Business 2015* incorporates 7 important changes. First, the ease of doing business ranking as well as all topic-level rankings are now computed on the basis of distance to frontier scores (see the chapter on the distance to frontier and ease of doing business ranking). Second, for the 11 economies with a population of more than 100 million, data for a second city have been added to the data set and the ranking calculation. These economies are Bangladesh, Brazil, China, India, Indonesia, Japan, Mexico, Nigeria, Pakistan, the Russian Federation and the United States. Third, for getting credit, the methodology has been revised for both the strength of legal rights index and the depth of credit information index. The number of points has been increased in both indices, from 10 to 12 for the strength of legal rights index and from 6 to 8 for the depth of credit information index. In addition, only credit bureaus and registries that cover at least 5% of the adult population can receive a score on the depth of credit information index.

Fourth, the name of the protecting investors indicator set has been changed to protecting minority investors to better reflect its scope—and the scope of the indicator set has been expanded to include shareholders' rights in corporate governance beyond related-party transactions. Fifth, the resolving insolvency indicator set has been expanded to include an index measuring the strength of the legal framework for insolvency. Sixth, the calculation of the distance to frontier score for paying taxes has been changed. The total tax rate component now enters the score in a nonlinear fashion, in an approach different from that used for all other indicators (see the chapter on the distance to frontier and ease of doing business ranking).

Finally, the name of the employing workers indicator set has been changed to labor market regulation, and the scope of this indicator set has also been changed. The indicators now focus on labor market regulation applying to the retail sector rather than the manufacturing sector, and their coverage has been expanded to include regulations on labor disputes and on benefits provided to workers. The labor market regulation indicators continue to be excluded from the aggregate distance to frontier score and ranking on the ease of doing business.

Beyond these changes there are 3 other updates in methodology. For paying taxes, the financial statement variables have been updated to be proportional to 2012 income per capita; previously they were proportional to 2005 income per capita. For enforcing contracts, the value of the claim is now set at twice the income per capita or \$5,000, whichever is greater. For dealing with construction permits, the cost of construction is now set at 50 times income per capita (before, the cost was assessed by the *Doing Business* respondents). In addition, this indicator set no longer includes the procedures for obtaining a landline telephone connection.

For more details on the changes, see the "What is changing in *Doing Business*?" chapter starting on page 24 of the *Doing Business 2015* report. For more details on the data and methodology, please see the "Data Notes" chapter starting on page 114 of the *Doing Business 2015* report. For more details on the distance to frontier metric, please see the "Distance to frontier and ease of doing business ranking" chapter in this profile.

THE BUSINESS ENVIRONMENT

For policy makers trying to improve their economy's regulatory environment for business, a good place to start is to find out how it compares with the regulatory environment in other economies. *Doing Business* provides an aggregate ranking on the ease of doing business based on indicator sets that measure and benchmark regulations applying to domestic small to medium-size businesses through their life cycle. Economies are ranked from 1 to 189 by the ease of doing business ranking. This year's report presents results for 2 aggregate measures: the distance to frontier score and the ease of doing business ranking. The ranking of economies is determined by sorting the aggregate distance to frontier (DTF) scores. The distance to frontier score benchmarks economies with respect to regulatory practice, showing the absolute distance to the best performance in each *Doing Business* indicator. An economy's distance to frontier score is indicated on a scale from 0 to 100, where 0 represents the worst performance and 100 the frontier. (See the chapter on the distance to frontier and ease of doing business). The 10 topics included in the ranking in *Doing Business 2015*: starting a business, dealing with construction permits, getting electricity, registering property, getting credit, protecting minority investors, paying taxes, trading across borders, enforcing contracts and resolving insolvency. The labor market regulation indicators (formerly employing workers) are not included in this year's aggregate ease of doing business ranking, but the data are presented in this year's economy profile.

The aggregate ranking on the ease of doing business benchmarks each economy's performance on the indicators against that of all other economies in the *Doing Business* sample (figure 1.1). While this ranking tells much about the business environment in an economy, it does not tell the whole story. The ranking on the ease of doing business, and the underlying indicators, do not measure all aspects of the business environment that matter to firms and investors or that affect the competitiveness of the economy. Still, a high ranking does mean that the government has created a regulatory environment conducive to operating a business.

ECONOMY OVERVIEW

Region: Europe & Central Asia

Income category: High income

Population: 143,499,861

GNI per capita (US\$): 13,860

DB2015 rank: 62

DB2014 rank: 64*

Change in rank: 2

DB 2015 DTF: 66.7

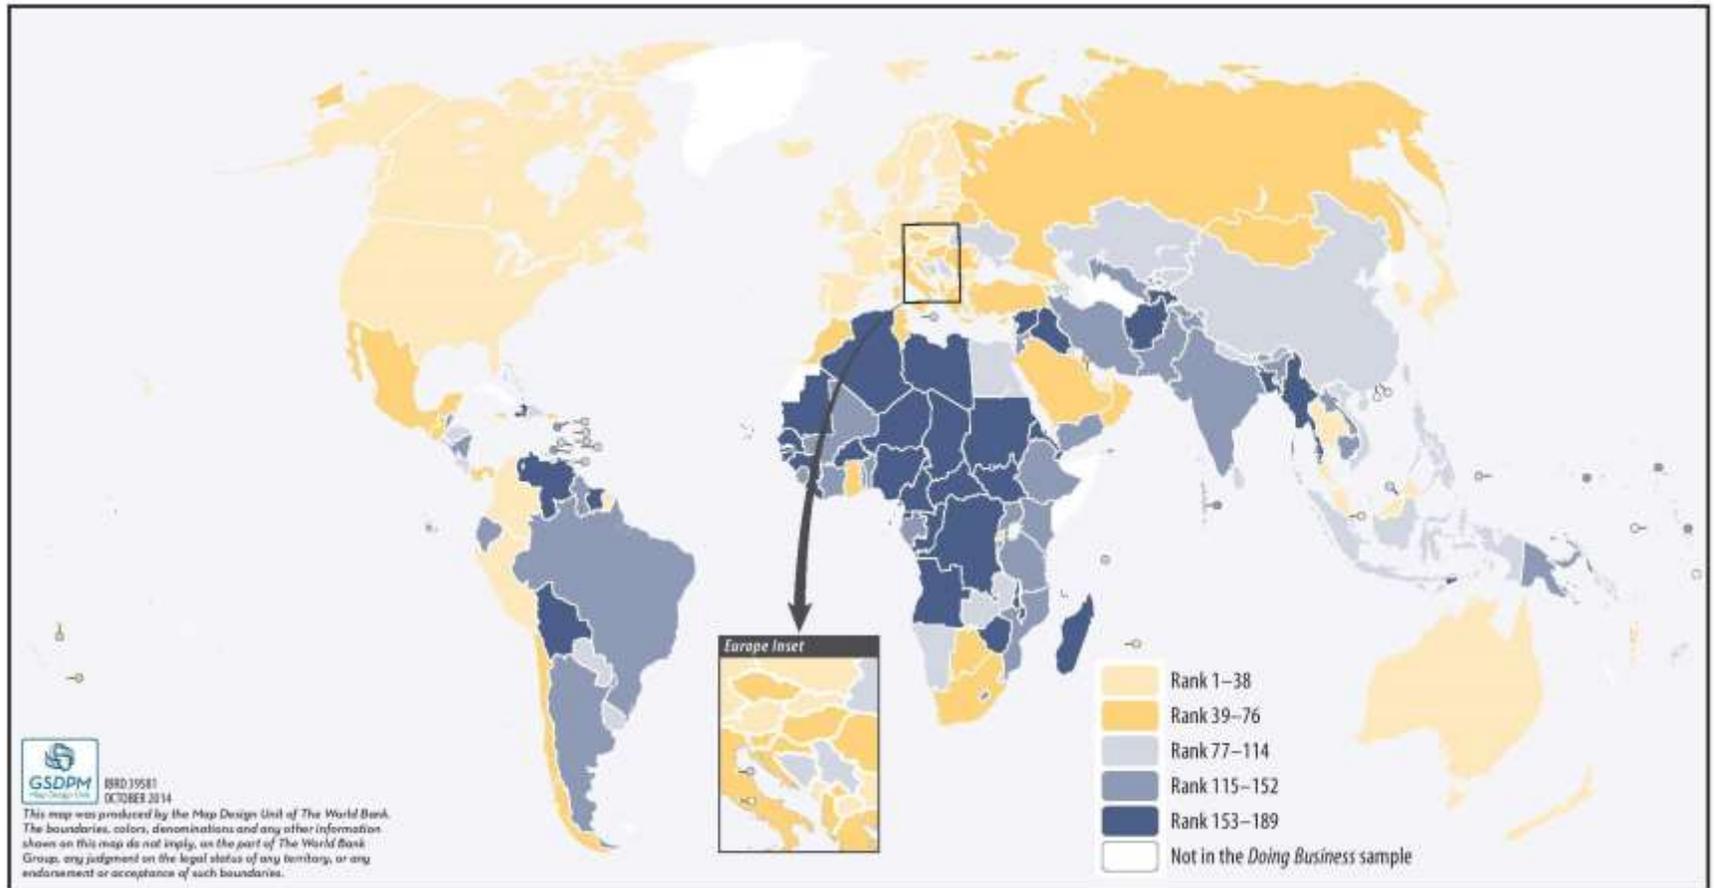

DB 2014 DTF: 65

Change in DTF: 1.7

* DB2014 ranking shown is not last year's published ranking but a comparable ranking for DB2014 that captures the effects of such factors as data corrections and the changes in methodology. See the data notes starting on page 114 of the *Doing Business 2015* report for sources and definitions.

THE BUSINESS ENVIRONMENT

Figure 1.1 Where economies stand in the global ranking on the ease of doing business

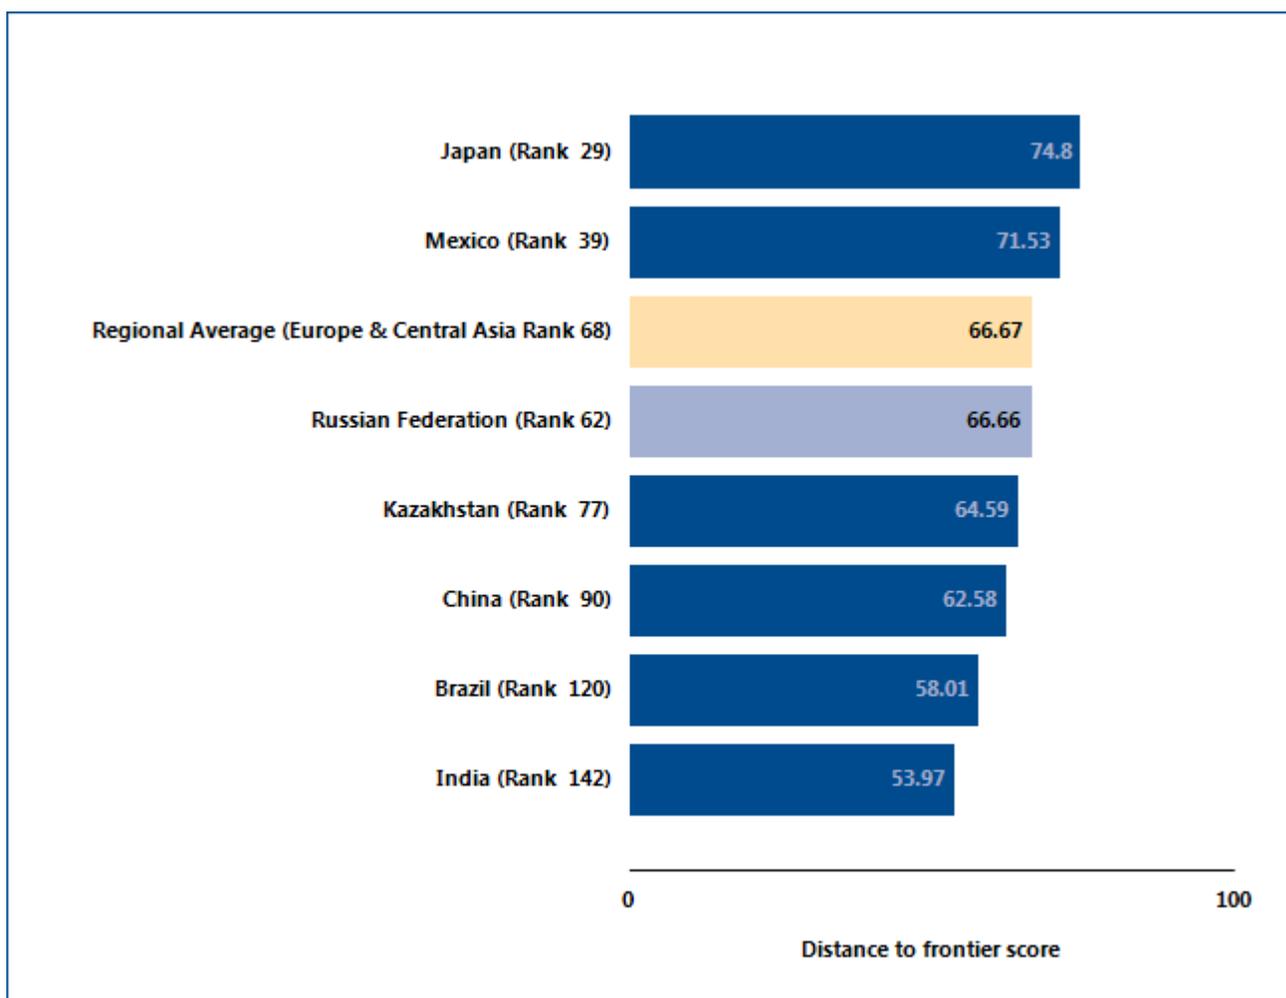

Source: *Doing Business* database.

THE BUSINESS ENVIRONMENT

For policy makers, knowing where their economy stands in the aggregate ranking on the ease of doing business is useful. Also useful is to know how it ranks relative to comparator economies and relative to the

regional average (figure 1.2). The economy's rankings (figure 1.3) and distance to frontier scores (figure 1.4) on the topics included in the ease of doing business ranking provide another perspective.

Figure 1.2 How Russian Federation and comparator economies rank on the ease of doing business

Note: The rankings are benchmarked to June 2014 and based on the average of each economy's distance to frontier (DTF) scores for the 10 topics included in this year's aggregate ranking. The distance to frontier score benchmarks economies with respect to regulatory practice, showing the absolute distance to the best performance in each *Doing Business* indicator. An economy's distance to frontier score is indicated on a scale from 0 to 100, where 0 represents the worst performance and 100 the frontier. For the economies for which the data cover 2 cities, scores are a population-weighted average for the 2 cities.

THE BUSINESS ENVIRONMENT

Figure 1.3 Rankings on *Doing Business* topics - Russian Federation
 (Scale: Rank 189 center, Rank 1 outer edge)

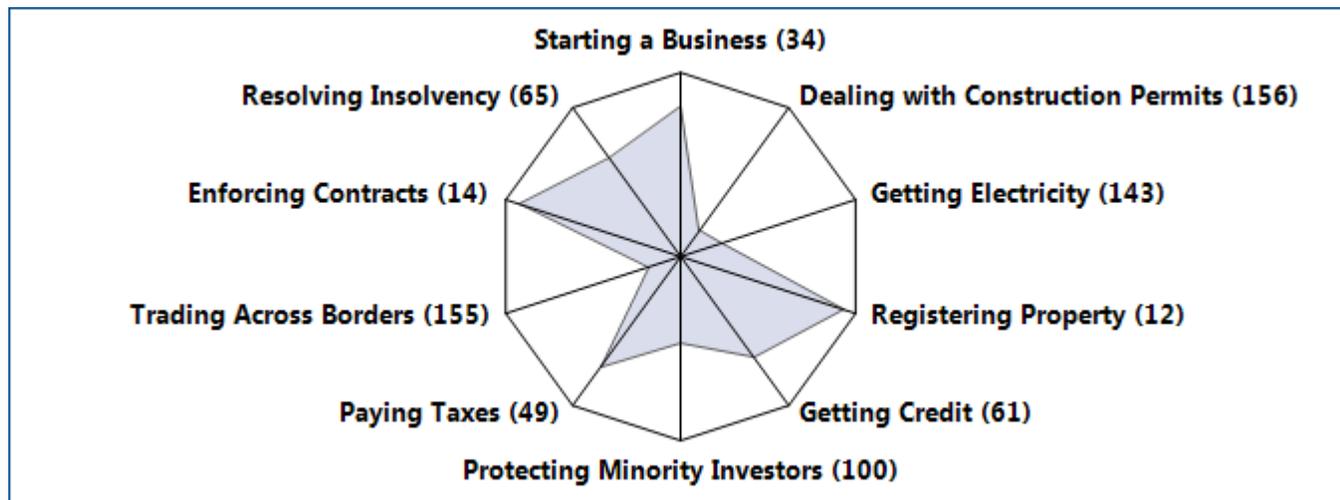

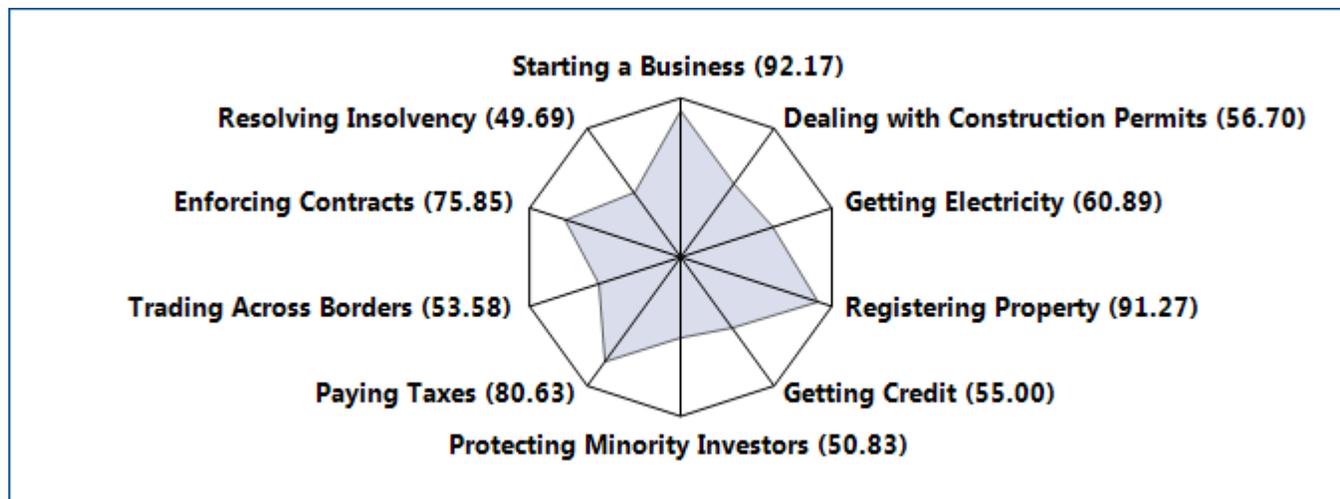

Figure 1.4 Distance to frontier scores on *Doing Business* topics - Russian Federation
 (Scale: Score 0 center, Score 100 outer edge)

Note: The rankings are benchmarked to June 2014 and based on the average of each economy’s distance to frontier (DTF) scores for the 10 topics included in this year’s aggregate ranking. The distance to frontier score benchmarks economies with respect to regulatory practice, showing the absolute distance to the best performance in each *Doing Business* indicator. An economy’s distance to frontier score is indicated on a scale from 0 to 100, where 0 represents the worst performance and 100 the frontier. For the economies for which the data cover 2 cities, scores are a population-weighted average for the 2 cities.
Source: *Doing Business* database.

THE BUSINESS ENVIRONMENT

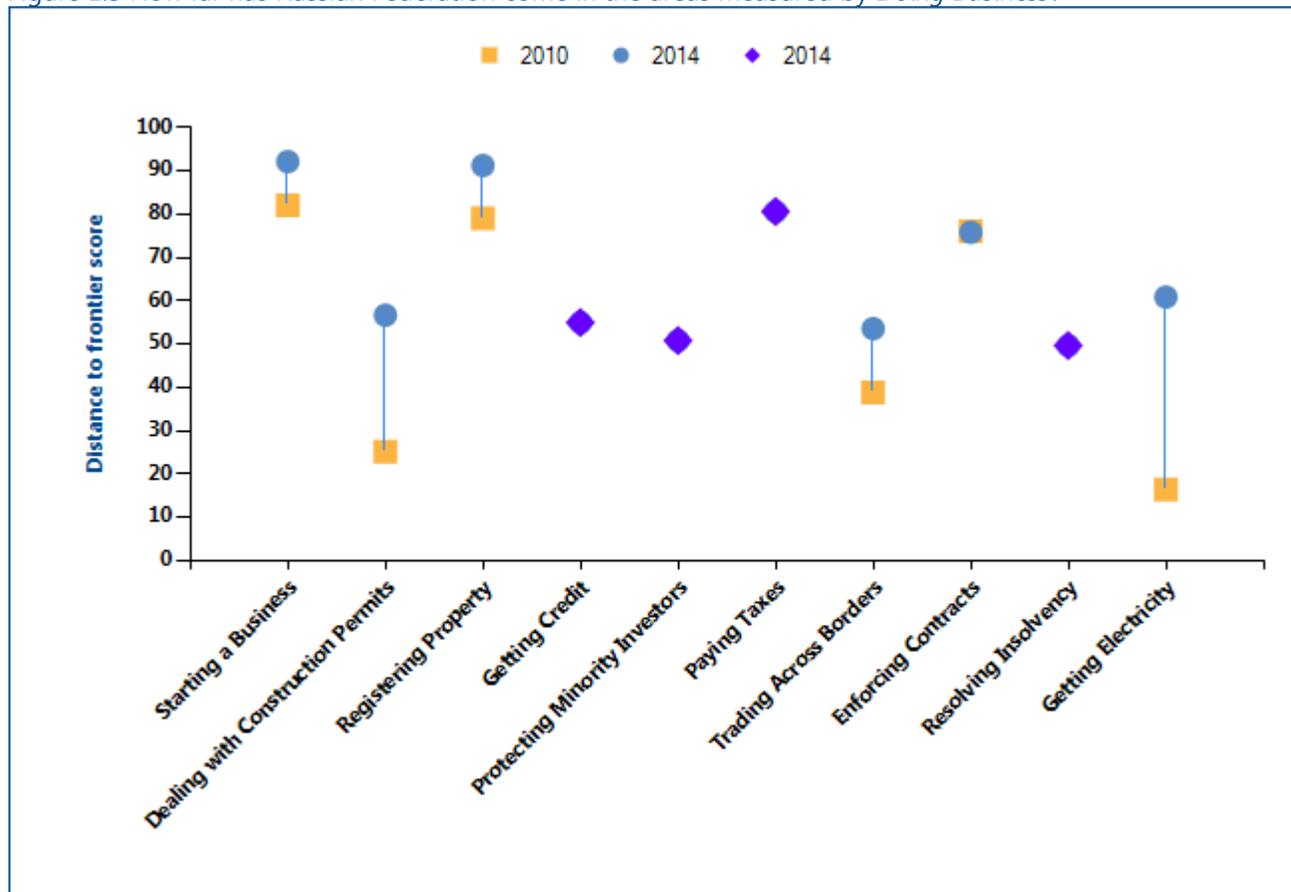

Just as the overall ranking on the ease of doing business tells only part of the story, so do changes in that ranking. Yearly movements in rankings can provide some indication of changes in an economy’s regulatory environment for firms, but they are always relative.

Moreover, year-to-year changes in the overall rankings do not reflect how the business regulatory environment in an economy has changed over time—or how it has changed in different areas. To aid in assessing such changes,

Doing Business introduced the distance to frontier score. This measure shows how far on average an economy is from the best performance achieved by any economy on each *Doing Business* indicator.

Comparing the measure for an economy at 2 points in time allows users to assess how much the economy’s regulatory environment as measured by *Doing Business* has changed over time—how far it has moved toward (or away from) the most efficient practices and strongest regulations in areas covered by *Doing Business* (figure 1.5).

Figure 1.5 How far has Russian Federation come in the areas measured by *Doing Business*?

Note: The distance to frontier score shows how far on average an economy is from the best performance achieved by any economy on each *Doing Business* indicator since 2010, except for getting credit, paying taxes, protecting minority investors and resolving insolvency which had methodology changes in 2014 and thus are only comparable to 2013. The measure is normalized to range between 0 and 100, with 100 representing the best performance (the frontier). See the data notes starting on page 114 of the *Doing Business 2015* report for more details on the distance to frontier score.

Source: *Doing Business* database.

THE BUSINESS ENVIRONMENT

The absolute values of the indicators tell another part of the story (table 1.1). The indicators, on their own or in comparison with the indicators of a good practice economy or those of comparator economies in the region, may reveal bottlenecks reflected in large numbers of procedures, long delays or high costs. Or they may reveal unexpected strengths in an area of business

regulation—such as a regulatory process that can be completed with a small number of procedures in a few days and at a low cost. Comparison of the economy's indicators today with those in the previous year may show where substantial bottlenecks persist—and where they are diminishing.

Indicator	Russian Federation DB2015	Russian Federation DB2014	Moscow DB2015	Saint Petersburg DB2015	Brazil DB2015	China DB2015	India DB2015	Japan DB2015	Best performer globally DB2015
Time (years)	2.0	2.0	2.0	1.8	4.0	1.7	4.3	0.6	Ireland (0.4)
Cost (% of estate)	9.0	9.0	9.0	9.0	12.0	22.0	9.0	3.5	Norway (1.0)
Outcome (0 as piecemeal sale and 1 as going concern)	0	0	0	0	1	0	0	1	
Recovery rate (cents on the dollar)	43.0	43.2	42.6	43.9	25.8	36.0	25.7	92.9	Japan (92.9)
Strength of insolvency framework index (0-16)	8.5	8.5	8.5	8.5	13.0	11.5	6.0	14.0	5 Economies (15.0)*

Note: DB2014 rankings shown are not last year's published rankings but comparable rankings for DB2014 that capture the effects of such factors as data corrections and changes to the methodology. Trading across borders deflated and non-deflated values are identical in DB2015 because it is defined as the base year for the deflator. The best performer on time for paying taxes is defined as the lowest time recorded among all economies in the DB2015 sample that levy the 3 major taxes: profit tax, labor taxes and mandatory contributions, and VAT or sales tax. If an economy has no laws or regulations covering a specific area—for example, insolvency—it receives a “no practice” mark. Similarly, an economy receives a “no practice” or “not possible” mark if regulation exists but is never used in practice or if a competing regulation prohibits such practice. Either way, a “no practice” mark puts the economy at the bottom of the ranking on the relevant indicator.

* Two or more economies share the top ranking on this indicator. A number shown in place of an economy's name indicates the number of economies that share the top ranking on the indicator. For a list of these economies, see the *Doing Business* website (<http://www.doingbusiness.org>).

Source: *Doing Business* database.

STARTING A BUSINESS

Formal registration of companies has many immediate benefits for the companies and for business owners and employees. Legal entities can outlive their founders. Resources are pooled as several shareholders join forces to start a company. Formally registered companies have access to services and institutions from courts to banks as well as to new markets. And their employees can benefit from protections provided by the law. An additional benefit comes with limited liability companies. These limit the financial liability of company owners to their investments, so personal assets of the owners are not put at risk. Where governments make registration easy, more entrepreneurs start businesses in the formal sector, creating more good jobs and generating more revenue for the government.

What do the indicators cover?

Doing Business measures the ease of starting a business in an economy by recording all procedures officially required or commonly done in practice by an entrepreneur to start up and formally operate an industrial or commercial business—as well as the time and cost required to complete these procedures. It also records the paid-in minimum capital that companies must deposit before registration (or within 3 months). The ranking of economies on the ease of starting a business is determined by sorting their distance to frontier scores for starting a business. These scores are the simple average of the distance to frontier scores for each of the component indicators.

To make the data comparable across economies, *Doing Business* uses several assumptions about the business and the procedures. It assumes that all information is readily available to the entrepreneur and that there has been no prior contact with officials. It also assumes that the entrepreneur will pay no bribes. And it assumes that the business:

- Is a limited liability company, located in the largest business city and is 100% domestically owned¹.
- Has between 10 and 50 employees.
- Conducts general commercial or industrial activities.
- Has a start-up capital of 10 times income per capita.
- Has a turnover of at least 100 times income per capita.
- Does not qualify for any special benefits.
- Does not own real estate.

WHAT THE STARTING A BUSINESS

INDICATORS MEASURE

Procedures to legally start and operate a company (number)

- Preregistration (for example, name verification or reservation, notarization)
- Registration in the economy's largest business city¹
- Postregistration (for example, social security registration, company seal)

Time required to complete each procedure (calendar days)

- Does not include time spent gathering information
- Each procedure starts on a separate day (2 procedures cannot start on the same day). Procedures that can be fully completed online are recorded as ½ day.
- Procedure completed once final document is received
- No prior contact with officials

Cost required to complete each procedure (% of income per capita)

- Official costs only, no bribes
- No professional fees unless services required by law

Paid-in minimum capital (% of income per capita)

- Deposited in a bank or with a notary before registration (or within 3 months)

¹ For the 11 economies with a population of more than 100 million, data for a second city have been added.

STARTING A BUSINESS

Where does the economy stand today?

What does it take to start a business in Russian Federation? According to data collected by *Doing Business*, starting a business there requires 4.4 procedures, takes 11.2 days, costs 1.2% of income per capita and requires paid-in minimum capital of 0.0% of income per capita (figure 2.1). Most indicator sets refer

to a case scenario in the largest business city of an economy, except for 11 economies for which the data are a population-weighted average of the 2 largest business cities. See the chapter on distance to frontier and ease of doing business ranking at the end of this profile for more details.

Figure 2.1 What it takes to start a business in Russian Federation - Moscow

Paid-in minimum capital (% of income per capita): 0.0

What it takes to start a business in Russian Federation - Saint Petersburg

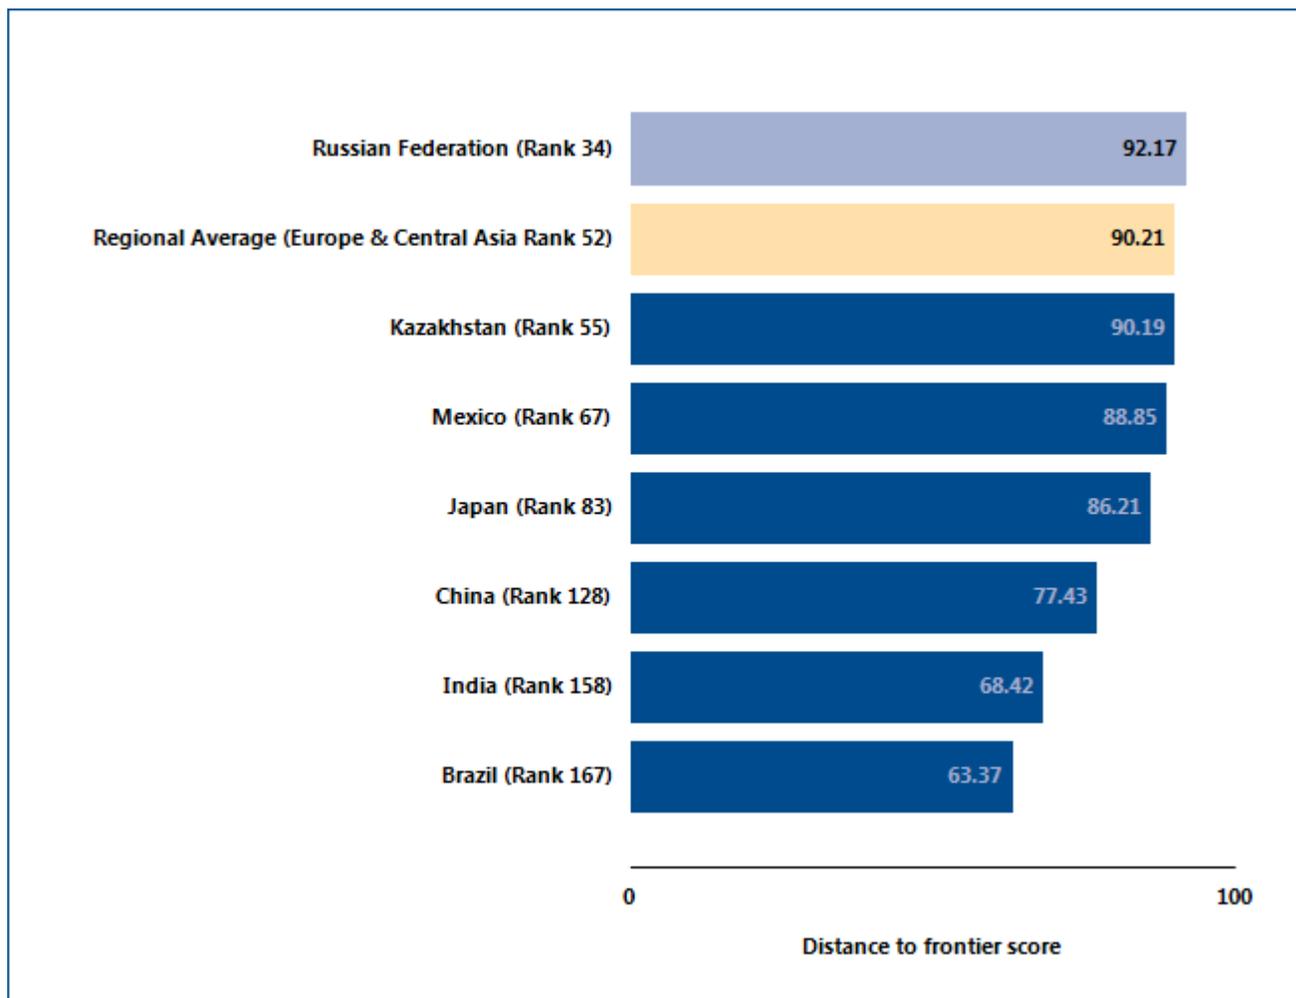

Note: Time shown in the figure above may not reflect simultaneity of procedures. Online procedures account for 0.5 days in the total time calculation. For more information on the methodology of the starting a business indicators, see the *Doing Business* website (<http://www.doingbusiness.org>). For details on the procedures reflected here, see the summary at the end of this chapter. Source: *Doing Business* database.

STARTING A BUSINESS

Globally, Russian Federation stands at 34 in the ranking of 189 economies on the ease of starting a business (figure 2.2). The rankings for comparator economies and

the regional average ranking provide other useful information for assessing how easy it is for an entrepreneur in Russian Federation to start a business.

Figure 2.2 How Russian Federation and comparator economies rank on the ease of starting a business

Source: Doing Business database.

STARTING A BUSINESS

Economies around the world have taken steps making it easier to start a business—streamlining procedures by setting up a one-stop shop, making procedures simpler or faster by introducing technology and reducing or eliminating minimum capital requirements. Many have undertaken business registration reforms in stages—and

they often are part of a larger regulatory reform program. Among the benefits have been greater firm satisfaction and savings and more registered businesses, financial resources and job opportunities.

What business registration reforms has *Doing Business* recorded in Russian Federation (table 2.1)?

Table 2.1 How has Russian Federation made starting a business easier—or not?
By *Doing Business* report year from DB2010 to DB2015

DB year	Reform
DB2014	Russia made starting a business easier by abolishing the requirement to have the bank signature card notarized before opening a company bank account.
DB2015	The Russian Federation made starting a business easier by eliminating the requirement to deposit the charter capital before company registration as well as the requirement to notify tax authorities of the opening of a bank account. This reform applies to both Moscow and St. Petersburg.

Note: For information on reforms in earlier years (back to DB2005), see the *Doing Business* reports for these years, available at <http://www.doingbusiness.org>.

Source: *Doing Business* database.

STARTING A BUSINESS

What are the details?

Underlying the indicators shown in this chapter for Russian Federation is a set of specific procedures—the bureaucratic and legal steps that an entrepreneur must complete to incorporate and register a new firm. These are identified by *Doing Business* through collaboration with relevant local professionals and the study of laws, regulations and publicly available information on business entry in that economy. Following is a detailed summary of those procedures, along with the associated time and cost. These procedures are those that apply to a company matching the standard assumptions (the “standardized company”) used by *Doing Business* in collecting the data (see the section in this chapter on what the indicators measure).

STANDARDIZED COMPANY

Legal form: Private Limited Liability Company (OOO)

Paid in minimum capital requirement: RUB 0

City: Moscow, Saint Petersburg

Start-up Capital: 10 times GNI per capita

Table 2.2 Summary of time, cost and procedures for starting a business in Russian Federation - Moscow

No.	Procedure	Time to complete	Cost to complete
1	<p>Notarize the signature made in the registration application</p> <p>Filled out and signed registration application must be notarized. A standard registration application form exists and it must be notarized. There is a stamp duty of RUB200 per copy. This cost does not include fees for technical work charged by notaries or lawyers if this application form is completed by them – the cost of RUB 200 assumes that the application form is filled out by the entrepreneur themselves. Fees of technical work by lawyer/notaries are only applicable in cases where there is a need to draft a charter, and thus are not applicable to our case study.</p> <p>Starting from May 5, 2014 this procedure ceased to be compulsory. If the founder is able to attend in person the Tax Service and file all the documents on his/her own, the application does not have to be notarized and the tax officer can certify the founder’s signature. However, this is possible only in case when all the founders are able to visit the Tax Service in Russia in person, otherwise the application must be notarized.</p> <p><i>Agency: Notary Public</i></p>	1 day	RUB 200 per copy
2	<p>Pay registration fee</p> <p>Payments must be made at Sberbank offices throughout Moscow, or at payment terminals at the Moscow Tax Service Office #46, where business registration is done.</p>	1 day	no charge

No.	Procedure	Time to complete	Cost to complete
	<p>Business registration fee of RUR 4,000 must be paid and a payment receipt will be issued through this machine, and must be presented for Procedure 4. It is a process that takes only a few minutes, but it must be done physically, and is not available online.</p> <p><i>Agency: Bank</i></p>		
3	<p>Make a seal in a private company in order to open a bank account</p> <p>The company needs to make a company seal before opening a bank account. The cost of acquiring a company seal at the average market price is RUB 350</p> <p><i>Agency: Seal-making service</i></p>	1 day	RUB 350
4	<p>Register with the unified register at the Federal Tax Service on the local level, to obtain the single number of state registration and the number of tax registration (identification number of taxpayer, INN)</p> <p>Documents required for registration:</p> <ul style="list-style-type: none"> • Decision of the founders meeting; • Charter (2 originals required, one is stamped by the Federal Tax Services and returned to applicants); • Registration Application, notarized; • Payment receipt. • Document Certifying the Physical Address of the New Company <p>It could be a lease agreement or a letter by the property owner of the leased property, certified with signature and building company's stamp. If the leasing office space is from an individual owner, this document would need notarization.</p> <p>The tax authorities sometimes implement a number of requirements, and failure to comply may lead to the rejection of the application.</p> <ul style="list-style-type: none"> - After registration application fee is paid (procedure 3), (1) the payment receipt (from procedure 3), along with the (2) Decision of the founders meeting, (3) 2 originals of the company charter, (4) the notarized registration application (from procedure 1) and (5) certificate that proofs the address of the new company are submitted for business registration. - At the time of application, the applicant receives a confirmation slip, which specifies the date that the registration will be complete, and the necessary documents can be picked up. This is always 5 working days (not counting the day of the application) after application. - On the day of pick up, the applicant will receive a package of documents, including Abstract of the registration, one of the original company charters (that the applicant submitted) stamped by the government; Tax Identification Number (TIN), etc. - If the applicant does not pick the registration documents from the 	7 days	RUB 4,000

No.	Procedure	Time to complete	Cost to complete
	<p>office, it is sent by mail. - The registration fee is RUR 4,000, and it always takes 5 business days – thus 7 calendar days.</p> <p><i>Agency: Federal Tax Service</i></p>		
<p>5</p>	<p>Open the company bank account; certify and register the owner's signature</p> <p>Banks require business registration and may require documents related to the founder's history and its financial status. Requirements in terms of client acceptance procedure vary depending on the bank. The bank finally provides the entrepreneur with a confirmation letter that contains details about the bank account. The entrepreneur needs this information to inform the Federal Tax Service about the opening of a bank account through the required notification.</p> <p>To open bank account following documents are required according to unified list of necessary documents:</p> <ul style="list-style-type: none"> a) certificate of state registration of the legal entity; b) founding documents of the legal entity. c) the license (permit) issued for a legal entity if such licenses (permits) are directly related to the capacity of the legal entity; d) bank signature card; e) documents, confirming authorities of the persons defined in bank signature card; f) documents, confirming authorities of the sole executive body of the legal entity. <p>Bank also may request additional documents that are not defined in the list above.</p> <p>1) List of necessary documents for opening a bank account defined in Instructions of the Bank of Russia N 28-I dated 14.09.2006. Because of a big number of different banks in Russian Federation, there is no common procedure for opening bank accounts and necessary documents.</p> <p>2) Actual term of opening a bank account depends on quantity of founders, country of their incorporation, quantity of documents that were submitted in bank in order to open bank account.</p> <p>In accordance with Article 22.1.10 of the Basic Principles of Russian Legislation on Notaries Public, the notary's fee for certification of signatures and bank cards is equal to RUB 200. The notary's total fee for such certification, including technical work, is approximately RUB 800 - 1200.</p> <ul style="list-style-type: none"> • The signature of the entrepreneur must be certified and registered by a bank. There is a special form (provided by the government) that must 	<p>3 days</p>	<p>free if done at the bank; RUB 200 (signatures and bank card) + RUB 1000 (notary fees) approximately if done with the notary</p>

No.	Procedure	Time to complete	Cost to complete
	<p>be completed for this procedure. In this form, there is a section where the company seal must be stamped.</p> <ul style="list-style-type: none"> • Entrepreneurs have two options. They can either (a) have its signature form notarized and then it can be brought to the bank when opening the bank account, or (b) they can certify the signature of the entrepreneur at the bank, when opening a bank account. <p>Cost: stamp-duty of RUR200 + if the document is filled out by lawyers or notaries, there will also be fees for technical fees. At the bank, Bank of Moscow and Sperbank both charge RUR500 to certify (for transaction fees) per signature (if there are more than 1 owner, one signature per company owner).</p> <p>Agency: Bank</p>		

* Takes place simultaneously with another procedure.

Note: Online procedures account for 0.5 days in the total time calculation.

Source: Doing Business database.

Summary of time, cost and procedures for starting a business in Russian Federation - Saint Petersburg

No.	Procedure	Time to complete	Cost to complete
1	<p>Pay the Registration Fee and Registration with the Unified State Register</p> <p>Documents needed to start a Business in Saint Petersburg: 1. Application for state registration of a legal entity upon its foundation; 2. Decision to found a company formalized by sole founder decision or protocol of the general meeting of founders; 3. Articles of incorporation of a legal entity (charter) (in two original copies – if filed in hard copy)</p> <p>Agency: the Unified State Register</p>	5 days	RUB 4,000
2	<p>Make a seal in a private company</p> <p>The company needs to make a company seal before opening a bank account. The cost of acquiring a company seal at the average market price is RUB 350</p> <p>Agency: Seal maker</p>	1 day	RUB 350
3	<p>Open a company bank account</p> <p>Fees may vary depending on the bank</p> <p>Agency: Commercial Bank</p>	1 day	RUB 500

* Takes place simultaneously with another procedure.

Note: Online procedures account for 0.5 days in the total time calculation.

DEALING WITH CONSTRUCTION PERMITS

Regulation of construction is critical to protect the public. But it needs to be efficient, to avoid excessive constraints on a sector that plays an important part in every economy. Where complying with building regulations is excessively costly in time and money, many builders opt out. They may pay bribes to pass inspections or simply build illegally, leading to hazardous construction that puts public safety at risk. Where compliance is simple, straightforward and inexpensive, everyone is better off.

What do the indicators cover?

Doing Business records the procedures, time and cost for a business in the construction industry to obtain all the necessary approvals to build a warehouse in the economy's largest business city, connect it to basic utilities and register the warehouse so that it can be used as collateral or transferred to another entity.

The ranking of economies on the ease of dealing with construction permits is determined by sorting their distance to frontier scores for dealing with construction permits. These scores are the simple average of the distance to frontier scores for each of the component indicators.

To make the data comparable across economies, *Doing Business* uses several assumptions about the business and the warehouse, including the utility connections.

The business:

- Is a limited liability company operating in the construction business and located in the largest business city. For the 11 economies with a population of more than 100 million, data for a second city have been added. Is domestically owned and operated.
- Has 60 builders and other employees.

The warehouse:

- Is valued at 50 times income per capita.
- Is a new construction (there was no previous construction on the land).

WHAT THE DEALING WITH CONSTRUCTION PERMITS INDICATORS MEASURE

Procedures to legally build a warehouse (number)

Submitting all relevant documents and obtaining all necessary clearances, licenses, permits and certificates

Submitting all required notifications and receiving all necessary inspections

Obtaining utility connections for water and sewerage

Registering the warehouse after its completion (if required for use as collateral or for transfer of the warehouse)

Time required to complete each procedure (calendar days)

Does not include time spent gathering information

Each procedure starts on a separate day. Procedures that can be fully completed online are recorded as ½ day.

Procedure considered completed once final document is received

No prior contact with officials

Cost required to complete each procedure (% of warehouse value)

Official costs only, no bribes

- Will have complete architectural and technical plans prepared by a licensed architect or engineer.
- Will be connected to water and sewerage (sewage system, septic tank or their equivalent). The connection to each utility network will be 150 meters (492 feet) long.
- Will be used for general storage, such as of books or stationery (not for goods requiring special conditions).
- Will take 30 weeks to construct (excluding all delays due to administrative and regulatory requirements).

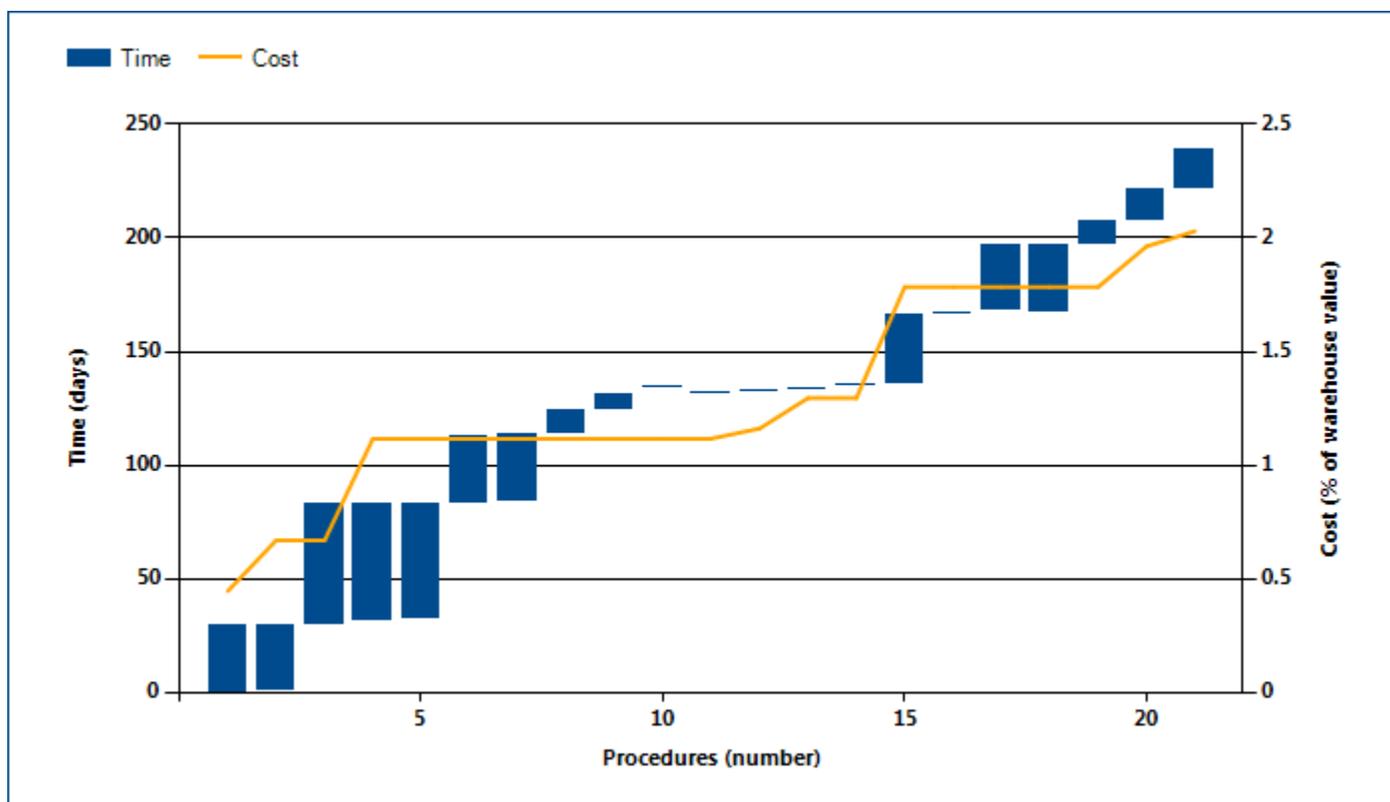

DEALING WITH CONSTRUCTION PERMITS

Where does the economy stand today?

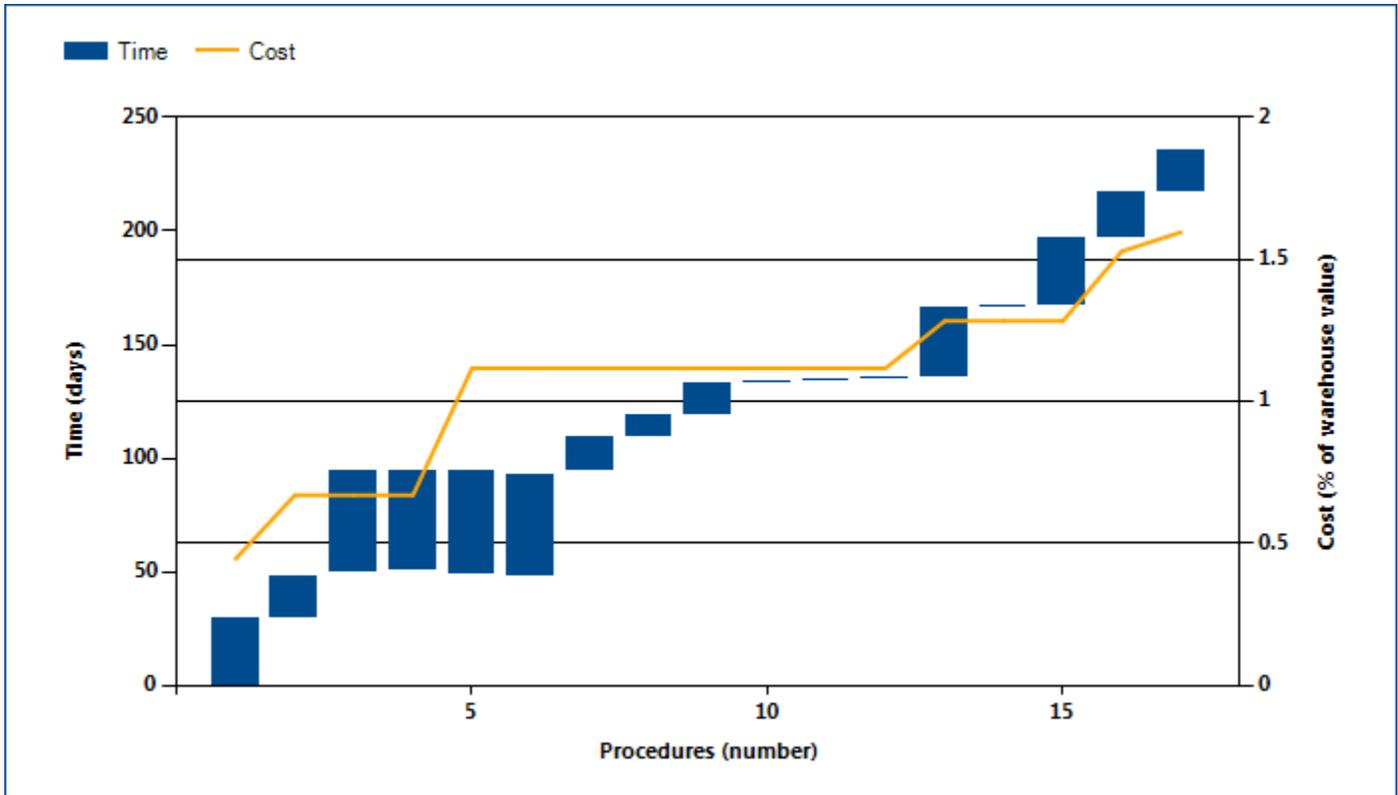

What does it take to comply with the formalities to build a warehouse in Russian Federation? According to data collected by *Doing Business*, dealing with construction permits there requires 19.8 procedures, takes 238.4 days and costs 1.9% of the warehouse value (figure 3.1). Most indicator sets refer to a case scenario in the largest

business city of an economy, except for 11 economies for which the data are a population-weighted average of the 2 largest business cities. See the chapter on distance to frontier and ease of doing business ranking at the end of this profile for more details.

Figure 3.1 What it takes to comply with formalities to build a warehouse in Russian Federation - Moscow

What it takes to comply with formalities to build a warehouse in Russian Federation - Saint Petersburg

Note: Time shown in the figure above may not reflect simultaneity of procedures. Online procedures account for 0.5 days in the total time calculation. For more information on the methodology of the dealing with construction permits indicators, see the *Doing Business* website (<http://www.doingbusiness.org>). For details on the procedures reflected here, see the summary at the end of this chapter.

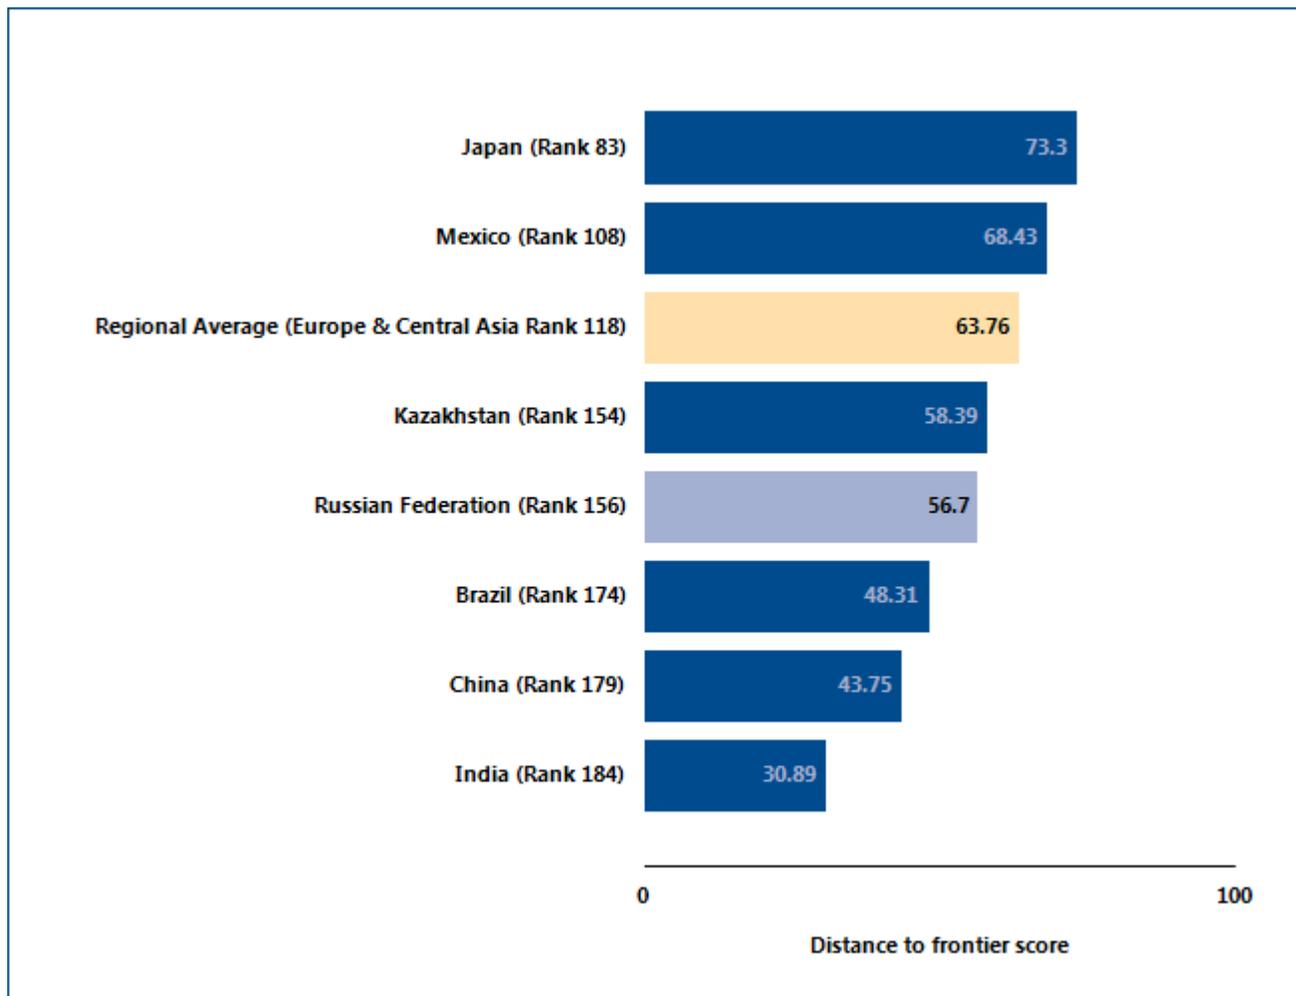

Source: *Doing Business* database.

DEALING WITH CONSTRUCTION PERMITS

Globally, Russian Federation stands at 156 in the ranking of 189 economies on the ease of dealing with construction permits (figure 3.2). The rankings for comparator economies and the regional average ranking

provide other useful information for assessing how easy it is for an entrepreneur in Russian Federation to legally build a warehouse.

Figure 3.2 How Russian Federation and comparator economies rank on the ease of dealing with construction permits

Source: Doing Business database.

DEALING WITH CONSTRUCTION PERMITS

Smart regulation ensures that standards are met while making compliance easy and accessible to all. Coherent and transparent rules, efficient processes and adequate allocation of resources are especially important in sectors where safety is at stake. Construction is one of them. In an effort to ensure building safety while keeping

compliance costs reasonable, governments around the world have worked on consolidating permitting requirements. What construction permitting reforms has *Doing Business* recorded in Russian Federation (table 3.1)?

Table 3.1 How has Russian Federation made dealing with construction permits easier—or not?
By *Doing Business* report year from DB2010 to DB2015

DB year	Reform
DB2011	Russia eased construction permitting by implementing a single window for all procedures related to land use.
DB2013	Russia made obtaining a construction permit simpler by eliminating requirements for several preconstruction approvals.
DB2014	Russia made dealing with construction permits easier by eliminating several requirements for project approvals from government agencies and by reducing the time required to register a new building.

Note: For information on reforms in earlier years (back to DB2006), see the *Doing Business* reports for these years, available at <http://www.doingbusiness.org>.

Source: *Doing Business* database.

DEALING WITH CONSTRUCTION PERMITS

What are the details?

The indicators reported here for Russian Federation are based on a set of specific procedures—the steps that a company must complete to legally build a warehouse—identified by *Doing Business* through information collected from experts in construction licensing, including architects, civil engineers, construction lawyers, construction firms, utility service providers and public officials who deal with building regulations. These procedures are those that apply to a company and structure matching the standard assumptions used by *Doing Business* in collecting the data (see the section in this chapter on what the indicators cover).

BUILDING A WAREHOUSE

Estimated cost of construction : RUB 22,383,180

City : Moscow, Saint Petersburg

The procedures, along with the associated time and cost, are summarized below.

Table 3.2 Summary of time, cost and procedures for dealing with construction permits in Russian Federation - Moscow

No.	Procedure	Time to complete	Cost to complete
1	<p>Request a topographic survey of the land plot</p> <p>BuildCo must obtain a land survey at a scale of 1:500/1 by a specialized organization. A report is prepared as a result of the topographic survey with a layout of the building and structure.</p> <p><i>Agency: Private Organization</i></p>	30 days	RUB 100,000
2	<p>* Obtain cadastral passport of the land</p> <p>BuildCo must obtain the cadastral passport of the land plot before applying for the development plan of the land plot. Cadastral engineers carry out a detailed survey of the land, based on which the Rosreestr issues the cadastral passport.</p> <p><i>Agency: Federal Service for State Registration, Cadastre and Cartography (Rosreestr)</i></p>	18 days	RUB 50,000
3	<p>Request and obtain the development plan of land plot (GPZU) at the Moscow Architecture and City Planning Committee</p> <p>A one-stop shop has been implemented at the Moscow Architecture and City Planning Committee (MoskomArkhitektura) in order to deal with all procedures related to land. BuildCo does not have to visit each agency in order to obtain the documents. Rather, BuildCo applies for the copy of the development plan of the land plot at MoskomArkhitektura and they take care of all the steps.</p> <p>The procedure takes from 45-60 days.</p> <p><i>Agency: The Moscow Architecture and City Planning Committee</i></p>	53 days	no charge

No.	Procedure	Time to complete	Cost to complete
4	<p>* Request and obtain an engineering and geological survey and obtain Act of Moscow Geological - Geodesic Department</p> <p>Information about conditions of the land plot (geological, geodesic and ecological) is needed for project design. There are 5 types of mandatory engineering surveys. All or a few of them are requested, depending on the land plot and surrounding territorial conditions.</p> <p>In the Doing Business case, there could be 2 -- 3 types of surveys. Mosgorgeotrest conduct these surveys, but private licensed companies can also conduct these surveys but in that case, the companies are requested to get the results 'stamped' by Mosgorgeotrest.</p> <p><i>Agency: Mosgorgeotrest / Private Licensed Companies</i></p>	45 days	RUB 100,000
5	<p>* Request and obtain technical conditions for water and sewage</p> <p>The technical conditions are defined by the Moscow Water and Sewage Company.</p> <p>Under Government Regulation No. 83 dated February 13, 2006:</p> <ul style="list-style-type: none"> • A list of technical conditions must be prepared by the local government when preparing the city development plan of the land plot. • If the city development plan of the land plot does not contain this information, the technical conditions, as well as the information on payment for connection to such services, must be provided by the respective agency within 14 business days after receiving the request. However, in practice it takes longer. <p>According to the fee schedule of Moscow State Unitary Enterprise "Vodokanal" for 2009, the fee for obtaining the technical conditions has increased from RUB 17,673.00 to RUB 21,300.00</p> <p><i>Agency: Moscow Water and Sewage Company - Mosvodokanal</i></p>	30 days	no charge
6	<p>Obtain compliance certificate from Moscow Water and Sewage Company</p> <p>BuildCo must obtain approval of the final construction design from the Moscow Water and Sewage Company, which will verify if the final design is in compliance with the technical conditions.</p> <p><i>Agency: Moscow Water and Sewage Company - Mosvodokanal</i></p>	30 days	no charge

No.	Procedure	Time to complete	Cost to complete
7	<p>* Request and obtain approval of the architectural and urban planning design</p> <p>Approval of the architectural and urban planning decision is required in order to have the approval of the facades and the location of the building by the chief architect of the city and subordinate agencies within the relevant municipality. Regulated by the Decree of the Government of Moscow № 284-PP dated 30 April 2014 (as amended).</p> <p>The required documents include:</p> <ol style="list-style-type: none"> 1) Scheme of the situational plan (based on 1:2000); 2) Urban planning scheme in combination with the scheme of the organization of the transport in the indicated territory (based on 1:500); 3) Drawings of the façade (based on 1:200); 4) The plan of the first floor, nonrecurring floors and underground levels (based on 1:200); 5) Schemes of the slits showing the elevations (based 1:200). <p><i>Agency: Moscomarchitectura</i></p>	30 days	no charge
8	<p>Request and obtain permission for construction</p> <p>To obtain the building permit (permission for construction), BuildCo must submit the following documents to the Moscow State Committee of Construction Supervision:</p> <ul style="list-style-type: none"> • Application form • Documents confirming title to the land • Town (planning) plan of land • Relevant project documentation <p>After reforms implemented in 2006, the statutory time line of issuing the permit was reduced from 30 days to 10. The permit is free of charge.</p> <p><i>Agency: Moscow State Committee of Construction Supervision</i></p>	10 days	no charge
9	<p>Request and obtain an opening order of production of works from the Union of Administrative Technical Inspections (UATI)</p> <p>UATI must provide an order for the commencement of excavation.</p> <p><i>Agency: Union of Administrative Technical Inspections (UATI)</i></p>	7 days	no charge
10	<p>Notify the Moscow District Municipality about the commencement of work</p> <p><i>Agency: Moscow District Municipality</i></p>	1 day	no charge

No.	Procedure	Time to complete	Cost to complete
11	<p>* Notify the Fire Department about the commencement of work</p> <p>Agency: Fire Department</p>	1 day	no charge
12	<p>* Order and receive results of laboratory tests of foundation pits from Mosgorgeotrest for the Acceptance Commission</p> <p>During the construction phase of an approved project, BuildCo must obtain results of laboratory tests which are required by the Acceptance Commission.</p> <p>Agency: Mosgorgeotrest</p>	1 day	RUB 10,000
13	<p>* Receive the set out inspection from the Mosgorgeotrest</p> <p>This inspection is done to make sure that the set out is properly done and that the building will be built where it is planned.</p> <p>Agency: Mosgorgeotrest</p>	1 day	RUB 30,000
14	<p>Receive random inspection during construction</p> <p>Construction activities are not interrupted during inspections.</p> <p>Agency: Union of Administrative Technical Inspections (UATI)</p>	1 day	no charge
15	<p>Connect to water and sewage services</p> <p>An agreement must be concluded between BuildCo and the Moscow Water and Sewage Company. The connection to water service is then installed.</p> <p>Agency: Moscow Water and Sewage Company - Mosvodokanal</p>	30 days	RUB 109,259
16	<p>Notify the Moscow District Municipality about the completion of construction</p> <p>Agency: Moscow District Municipality</p>	1 day	no charge
17	<p>Receive final inspection by Moscow State Committee of Construction Supervision</p> <p>Agency: Moscow State Committee of Construction Supervision</p>	1 day	no charge

No.	Procedure	Time to complete	Cost to complete
18	<p>* Request and convene Acceptance Commission</p> <p>BuildCo files application forms with the Moscow State Committee of Construction Supervision in order to convene the Acceptance Commission. The Commission includes representatives from different agencies, such as ecology, the prefecture, the local government, the sanitary services, the company, and the designer. After the Commission has convened, BuildCo collects the signatures of all its members.</p> <p>The timeline established by Government of Moscow Resolution No. 530 (dated November 7, 2001) for the relevant authorities to appoint representatives to the Acceptance Commission is 10 days. The time required for approval of the building depends on the state of the building (whether it is ready to be occupied or not) and on the inspection results. In practice, this takes on average 60 days. The most difficult part is to convene the members of the Commission and gather their signatures for approval.</p> <p><i>Agency: Moscow State Committee of Construction Supervision</i></p>	30 days	no charge
19	<p>Request and receive the disposition on operation of building (occupancy permit)</p> <p><i>Agency: Moscow State Committee of Construction Supervision</i></p>	10 days	no charge
20	<p>Request and receive the technical plans / cadastre passports of the building</p> <p><i>Agency: Bureau of Technical Inventory (BTI)</i></p>	14 days	RUB 40,000
21	<p>Register the building after completion in Rosreestr</p> <p>According to the Russian Federation Civil Code, the right to own and "create" immovable things, including buildings, is subject to state registration at the Unified State Register of rights to immovable assets and associated transactions.</p> <p>To complete the registration, BuildCo must submit an application, the real property plan, and approval of the building, confirming that real property has been built. Based on the order of the Federal Service for State Registration, Cadastre and Cartography (Rosreestr) on Moscow dated 08.15.2012, the time limit for completing the registration is 20</p>	18 days	RUB 15,000

No.	Procedure	Time to complete	Cost to complete
	<p>calendar days from the application date.</p> <p>Payment of a duty is required for registration. The state duty for building registration is RUB 15,000.00 (for legal entities).</p> <p><i>Agency: Federal Service for State Registration, Cadastre and Cartography (Rosreestr)</i></p>		

* Takes place simultaneously with another procedure.

Note: Online procedures account for 0.5 days in the total time calculation.

Summary of time, cost and procedures for dealing with construction permits in Russian Federation - Saint Petersburg

No.	Procedure	Time to complete	Cost to complete
1	<p>Request a topographic survey of the land plot</p> <p>BuildCo must obtain a land survey at a scale of 1:500/1 by a specialized organization. A report is prepared as a result of the topographic survey with a layout of the building and structure.</p> <p><i>Agency: Specialized Organization</i></p>	30 days	RUB 100,000
2	<p>Obtain cadastral passport of the land plot</p> <p>The cadastre passport is required in order to obtain the development plan of land plot. The statutory time frame for issuing a cadastre passport is 18 calendar days. The process involves surveying the land plot by specialized cadastral engineers and preparing a cadastral passport. The average cost of the entire procedure (including cadastre survey and obtaining the cadastre passport) is RUB 50,000 – 100,000.</p> <p><i>Agency: Federal Service for State Registration, Cadastre and Cartography (Rosreestr)</i></p>	18 days	RUB 50,000
3	<p>Request and obtain the development plan of land plot</p> <p>Development plan of the land plot is a mandatory document, which is required in order to receive state expertise of project documentation and to obtain a building permit. It is also required at the end of the construction in order to obtain the occupancy certificate.</p> <p>The applicant shall provide the land plot documents, preliminary drawings of the proposed construction and constituent documents (registration documents and other supporting documentation verifying the legal status of BuildCo).</p> <p><i>Agency: Saint-Petersburg Architecture and City Planning Committee</i></p>	30 days	no charge

No.	Procedure	Time to complete	Cost to complete
4	<p>* Request and obtain the decision of the State Administrative Technical Inspectorate on fencing the construction site</p> <p>The State Administrative Technical Inspectorate grants permission on fencing the construction site in order to maintain safety during construction.</p> <p><i>Agency: State Administrative Technical Inspectorate</i></p>	16 days	no charge
5	<p>* Request and obtain an engineering and geological survey of the land plot</p> <p>Information about conditions of the land plot (geological, geodesic and ecological) is needed for project design. There are 5 types of mandatory engineering surveys. All or a few of them are requested, depending on the land plot and surrounding territorial conditions. In the Doing Business case, there could be 2 -- 3 types of surveys.</p> <p>Engineering surveys are performed by private companies which belong to self-regulated organizations (SRO).</p> <p><i>Agency: Licensed Private Company</i></p>	45 days	RUB 100,000
6	<p>* Request and obtain technical conditions for water and sewage</p> <p>According to the applicable regulations, the technical conditions should be provided within 16 business days. However, in practice it takes about 45 days to obtain the technical conditions for the water and sewage connection.</p> <p><i>Agency: Saint-Petersburg Water and Sewage Company (Vodokanal)</i></p>	45 days	no charge
7	<p>Request and obtain approval of the architectural and urban planning design by Saint-Petersburg Architecture and City Planning Committee (KGA)</p> <p>The Saint-Petersburg Architecture and City Planning Committee (KGA) and Chief Architect must approve the layout of the land plot and the architectural design.</p> <p><i>Agency: Saint-Petersburg Architecture and City Planning Committee (KGA)</i></p>	15 days	no charge
8	<p>Request and obtain permission for construction</p> <p>To obtain the building permit (permission for construction), BuildCo must submit the following documents to the State Agency of Construction Supervision and Expertise of Saint-Petersburg:</p> <ul style="list-style-type: none"> • Application form • Documents confirming title to the land • Town (planning) plan of land • Relevant project documentation 	10 days	no charge

No.	Procedure	Time to complete	Cost to complete
	<p>The permit is free of charge.</p> <p><i>Agency: State Agency of Construction Supervision and Expertise of Saint-Petersburg</i></p>		
9	<p>Request and obtain an opening order of production of works from the State Administrative Technical Inspectorate</p> <p><i>Agency: State Administrative Technical Inspectorate</i></p>	14 days	no charge
10	<p>Notify the State Agency of Construction Supervision and Expertise of Saint-Petersburg about commencement of construction works</p> <p><i>Agency: State Agency of Construction Supervision and Expertise of Saint-Petersburg</i></p>	1 day	no charge
11	<p>Receive inspection from the State Agency of Construction Supervision and Expertise</p> <p>The State Agency of Construction Supervision and Expertise of Saint-Petersburg will generally perform one inspection during construction.</p> <p><i>Agency: State Agency of Construction Supervision and Expertise of Saint-Petersburg</i></p>	1 day	no charge
12	<p>Request terms of connection to utility networks and request a contract for water and sewage connection</p> <p>BuildCo submits the following documents to Vodokanal of Saint-Petersburg in order to request a water and sewage connection:</p> <ul style="list-style-type: none"> - Copies of constituent documents (registration documents and other supporting documentation verifying the legal status of BuildCo) - Cadastral plan of the land - Technical conditions for water and sewage - Estimated balance of water consumption and wastewater usage - Topographic map of the land on a scale of 1:500 - Urban development plan for the land <p><i>Agency: Saint-Petersburg Vodokanal</i></p>	1 day	no charge
13	<p>Obtain connection to water and sewage services</p> <p>BuildCo signs the contract prepared by the water and sewage company and requests the date of connection to water and sewage services. The water and sewage company will provide the connection according to the date specified in the contract.</p>	30 days	RUB 37,161

No.	Procedure	Time to complete	Cost to complete
	<i>Agency: Saint-Petersburg Vodocanal</i>		
14	<p>Receive final inspection from the State Agency of Construction Supervision and Expertise</p> <p>After the completion of construction works, the State Agency of Construction Supervision and Expertise of Saint-Petersburg conducts a final inspection to verify if the building was built according to the approved design conditions.</p> <p><i>Agency: State Agency of Construction Supervision and Expertise of Saint-Petersburg</i></p>	1 day	no charge
15	<p>Request and receive the disposition on operation of the building (occupancy permit)</p> <p>In order to obtain permission to use the building, it is necessary to apply to the State Agency of Construction Supervision and Expertise of Saint-Petersburg with the following documents:</p> <ol style="list-style-type: none"> 1) land ownership documents 2) development plan of the land plot 3) building permit 4) a document confirming that the constructed building meets the requirements of technical regulations signed by the person responsible for conducting the construction works 5) a detailed map showing the location of the construction, location of the utility networks within the boundaries of the land plot and the schematic plan of the land plot. The document should be signed by the person responsible for conducting the construction works. <p><i>Agency: State Agency of Construction Supervision and Expertise of Saint-Petersburg</i></p>	30 days	no charge
16	<p>Request and obtain a technical plan of the building</p> <p>BuildCo has to provide technical and cadastral plans of the building in order to be able to register the building at the Federal Service for State Registration, Cadastre and Cartography.</p> <p>Preparation of the technical plan of the building can be done by either a licensed cadastral engineer or the Bureau of Technical Inventory. The preparation of the technical plan can take from 10 to 30 days.</p> <p><i>Agency: Cadastral Engineers / Bureau of Technical Inventory</i></p>	20 days	RUB 55,000

No.	Procedure	Time to complete	Cost to complete
17	<p>Register the building at Rosreestr</p> <p>According to the Russian Federation Civil Code, the right to own and "create" immovable things, including buildings, is subject to state registration at the Unified State Register of rights to immovable assets and associated transactions.</p> <p><i>Agency: Federal Service for State Registration, Cadastre and Cartography (Rosreestr)</i></p>	18 days	RUB 15,000

* Takes place simultaneously with another procedure.

Note: Online procedures account for 0.5 days in the total time calculation.

GETTING ELECTRICITY

Access to reliable and affordable electricity is vital for businesses. To counter weak electricity supply, many firms in developing economies have to rely on self-supply, often at a prohibitively high cost. Whether electricity is reliably available or not, the first step for a customer is always to gain access by obtaining a connection.

What do the indicators cover?

Doing Business records all procedures required for a local business to obtain a permanent electricity connection and supply for a standardized warehouse, as well as the time and cost to complete them. These procedures include applications and contracts with electricity utilities, clearances from other agencies and the external and final connection works. The ranking of economies on the ease of getting electricity is determined by sorting their distance to frontier scores for getting electricity. These scores are the simple average of the distance to frontier scores for each of the component indicators. To make the data comparable across economies, several assumptions are used.

The warehouse:

- Is owned by a local entrepreneur, located in the economy's largest business city, in an area where other warehouses are located. For the 11 economies with a population of more than 100 million, data for a second city have been added.
- Is not in a special economic zone where the connection would be eligible for subsidization or faster service.
- Is located in an area with no physical constraints (ie. property not near a railway).
- Is a new construction being connected to electricity for the first time.
- Is 2 stories, both above ground, with a total surface of about 1,300.6 square meters (14,000 square feet), is built on a plot of 929 square meters (10,000 square feet), is used for storage of refrigerated goods

The electricity connection:

- Is 150 meters long and is a 3-phase, 4-wire Y, 140-kilovolt-ampere (kVA) (subscribed capacity) connection.

WHAT THE GETTING ELECTRICITY INDICATORS MEASURE

Procedures to obtain an electricity connection (number)

- Submitting all relevant documents and obtaining all necessary clearances and permits
- Completing all required notifications and receiving all necessary inspections
- Obtaining external installation works and possibly purchasing material for these works
- Concluding any necessary supply contract and obtaining final supply

Time required to complete each procedure (calendar days)

- Is at least 1 calendar day
- Each procedure starts on a separate day
- Does not include time spent gathering information
- Reflects the time spent in practice, with little follow-up and no prior contact with officials

Cost required to complete each procedure (% of income per capita)

- Official costs only, no bribes
- Excludes value added tax
- Is to either the low-voltage or the medium-voltage distribution network and either overhead or underground, whichever is more common in the area where the warehouse is located. Included only negligible length in the customer's private domain.
- Requires crossing of a 10-meter road but all the works are carried out in a public land, so there is no crossing into other people's private property.
- Involves installing one electricity meter. The monthly electricity consumption will be 26880 kilowatt hour (kWh). The internal electrical wiring has been completed.

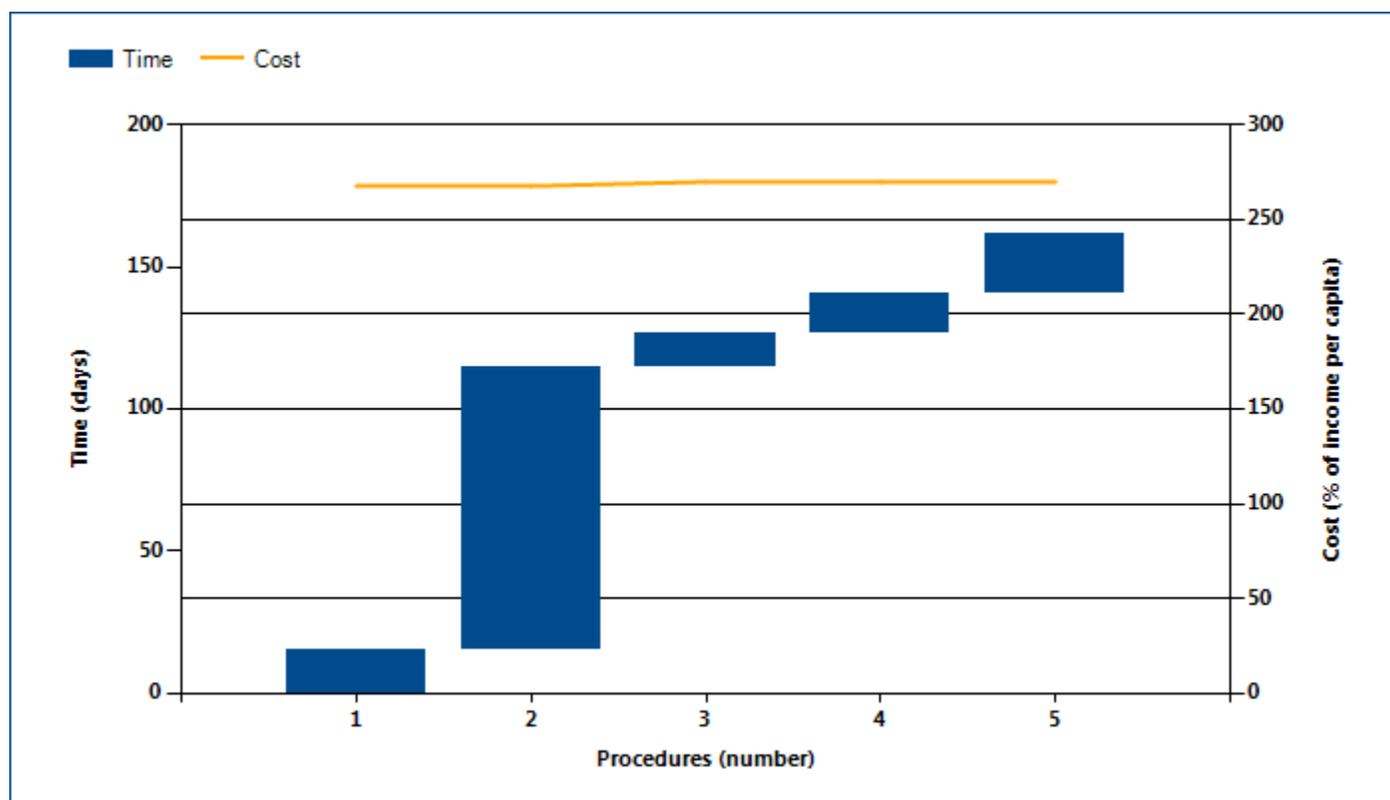

GETTING ELECTRICITY

Where does the economy stand today?

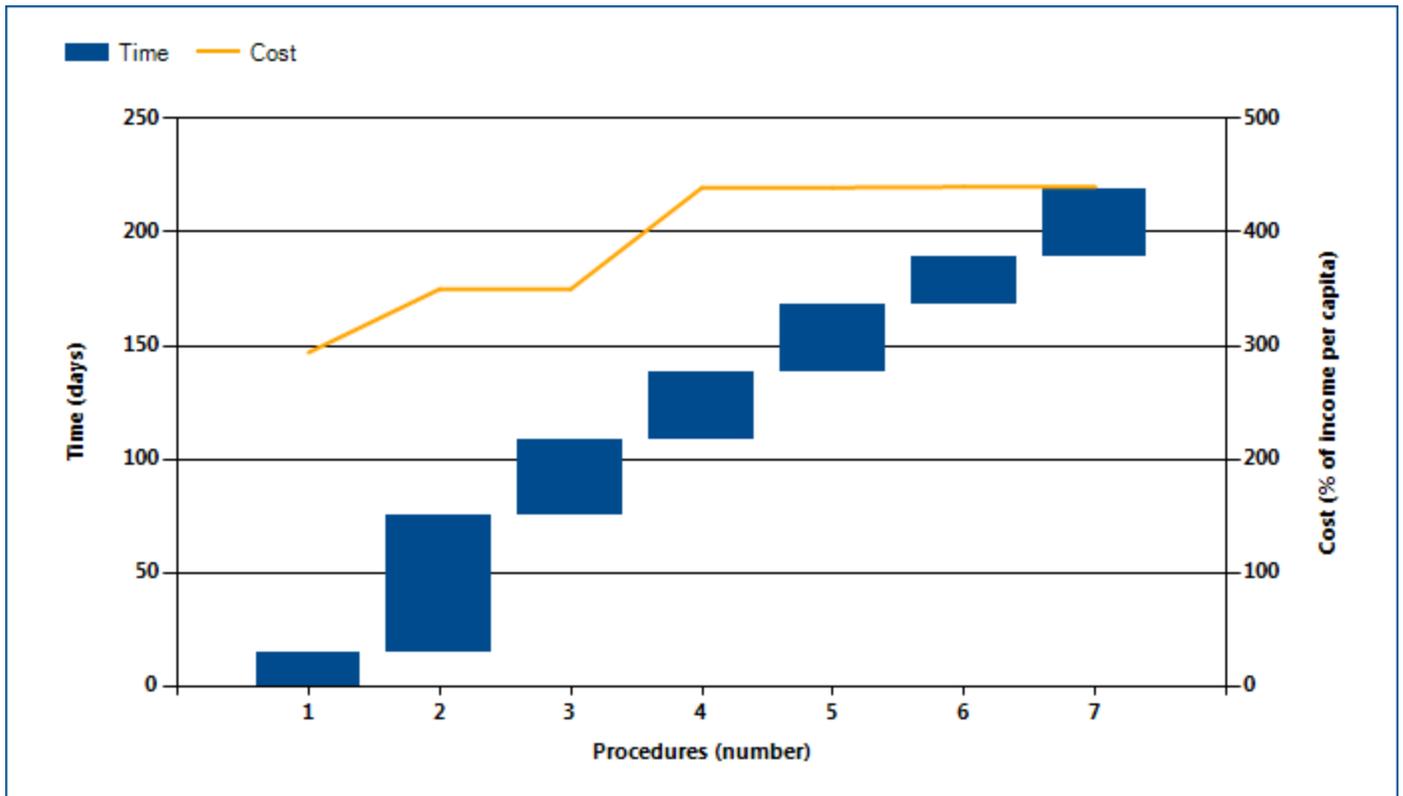

What does it take to obtain a new electricity connection in Russian Federation? According to data collected by *Doing Business*, getting electricity there requires 5.6 procedures, takes 179.1 days and costs 321.0% of income per capita (figure 4.1).

Most indicator sets refer to a case scenario in the largest business city of an economy, except for 11 economies for which the data are a population-weighted average of the 2 largest business cities. See the chapter on distance to frontier and ease of doing business ranking at the end of this profile for more details.

Figure 4.1 What it takes to obtain an electricity connection in Russian Federation - Moscow

What it takes to obtain an electricity connection in Russian Federation - Saint Petersburg

Note: Time shown in the figure above may not reflect simultaneity of procedures. For more information on the methodology of the getting electricity indicators, see the *Doing Business* website (<http://www.doingbusiness.org>). For details on the procedures reflected here, see the summary at the end of this chapter.

GETTING ELECTRICITY

Globally, Russian Federation stands at 143 in the ranking of 189 economies on the ease of getting electricity (figure 4.2). The rankings for comparator economies and the regional average ranking provide another

perspective in assessing how easy it is for an entrepreneur in Russian Federation to connect a warehouse to electricity.

Figure 4.2 How Russian Federation and comparator economies rank on the ease of getting electricity

Source: Doing Business database.

GETTING ELECTRICITY

Obtaining an electricity connection is essential to enable a business to conduct its most basic operations. In many economies the connection process is complicated by the multiple laws and regulations involved—covering service quality, general safety, technical standards, procurement practices and internal wiring installations. In an effort to

ensure safety in the connection process while keeping connection costs reasonable, governments around the world have worked to consolidate requirements for obtaining an electricity connection. What reforms in getting electricity has *Doing Business* recorded in Russian Federation (table 4.1)?

Table 4.1 How has Russian Federation made getting electricity easier—or not?

By *Doing Business* report year from DB2010 to DB2015

DB year	Reform
DB2012	Russian Federation made getting electricity less costly by revising the tariffs for connection.
DB2014	Russia made getting electricity simpler and less costly by setting standard connection tariffs and eliminating many procedures previously required.

Source: *Doing Business* database.

GETTING ELECTRICITY

What are the details?

The indicators reported here for Russian Federation are based on a set of specific procedures—the steps that an entrepreneur must complete to get a warehouse connected to electricity by the local distribution utility—identified by *Doing Business*. Data are collected from the distribution utility, then completed and verified by electricity regulatory agencies and independent professionals such as electrical engineers, electrical contractors and construction companies. The electricity distribution utility surveyed is the one serving the area (or areas) in which warehouses are located. If there is a choice of distribution utilities, the one serving the largest number of customers is selected.

OBTAINING AN ELECTRICITY CONNECTION

Name of utility - Moscow:

MOESK

Name of utility - Saint Petersburg:

Lenenergo (Ленэнерго)

City:

Moscow, Saint Petersburg

The procedures are those that apply to a warehouse and electricity connection matching the standard assumptions used by *Doing Business* in collecting the data (see the section in this chapter on what the indicators cover). The procedures, along with the associated time and cost, are summarized below.

Table 4.2 Summary of time, cost and procedures for getting electricity in Russian Federation - Moscow

No.	Procedure	Time to complete	Cost to complete
1	<p>Submit an application for an electricity connection to the local office of MOESK, await technical conditions, and sign contract</p> <p>1. If the required load is less than 750 KW an application for an electricity connection is submitted to a local office of MOESK. Above 750 KW an application is submitted to the central office of MOESK.</p> <p>The following documents are attached to the application: 1) Plan of the location of electrical equipment; 2) Plan of electrical cables with the justification of the required load; 3) a copy of the license of the firm which prepared the plan.</p> <p>Furthermore, the applicant should present documents certifying the legal status of the customer or his representative: a certificate from the Business Registry, a certificate from tax authorities, and document certifying the head of the organization.</p> <p>Once technical conditions are ready MOESK notifies the customer and a connection contract is signed.</p> <p>There is not external inspection for the preparation of the technical conditions.</p> <p>Application can be submitted in person or online on MOESK’s electronic portal, http://utp.moesk.ru/my/ in a “personal cabinet”. Alternatively, application can be mailed via regular post. On every stage of the application processing, the applicant receives a text-message notification</p>	15 calendar days	RUB 1,198,911.44

No.	Procedure	Time to complete	Cost to complete
	<p>to the cellular phone indicated on the application form. It is also possible to track the status of the application by visiting the online "personal cabinet".</p> <p><i>Agency: MOESK</i></p>		
2	<p>Customer obtains external connection works and meter installation by MOESK</p> <p>Upon receipt of the application and the duly signed agreement, the network organization will prepare project design for building a network for connection and obtain all approvals for construction work (such as, a permit required for the laying of underground or overhead lines), and carry out all the external works according to the contract and the technical specifications.</p> <p>Network organization performs all work up to the land boundaries of the applicant and assumes the responsibility of the performed work, and the applicant is responsible for the performance of work within the boundaries of their plot.</p> <p>The applicant, if desired, designs and builds network only within the boundaries of their land on their own or entrusts this work to network organization under a separate contract.</p> <p>JSC "Moscow United Electric Grid" performs the following steps:</p> <ul style="list-style-type: none"> • the inclusion of the amount of work in the investment program of JSC "Moscow United Electric Grid"; • carrying out procurement procedures; • carrying out the physical works involving the installation of the substation. <p><i>Agency: MOESK</i></p>	100 calendar days	RUB 0
3	<p>Customer obtains inspection of the meter by Mosenergosbyt</p> <p>After the external connection works and installation of the meter by the electrical contractor the meter is checked by Energosbyt.</p> <p><i>Agency: Mosenergosbyt</i></p>	12 calendar days	RUB 10,000

No.	Procedure	Time to complete	Cost to complete
4	<p>MOESK conducts final inspection and seals the meter</p> <p>The utility completes the physical/actual connection without turning on the power yet. The customer visits the regional office of MOESK, concludes a contract dividing responsibilities for maintenance and ownership of electrical equipment, signs a document on the completion of the technical connection and a document that the service was accepted. MOESK dispatches a technical team to inspect the connection and to seal the meter.</p> <p><i>Agency: MOESK</i></p>	14 calendar days	RUB 0
5	<p>Customer signs a supply contract with Mosenergosbyt (supply company)</p> <p>Customer visits Mosenergosbyt to conclude a supply contract.</p> <p>From February, 2014 it became possible to select a preferred supplier in the application form for a technological connection.</p> <p><i>Agency: Mosenergosbyt</i></p>	21 calendar days	RUB 0

* Takes place simultaneously with another procedure.

REGISTERING PROPERTY

Ensuring formal property rights is fundamental. Effective administration of land is part of that. If formal property transfer is too costly or complicated, formal titles might go informal again. And where property is informal or poorly administered, it has little chance of being accepted as collateral for loans—limiting access to finance.

What do the indicators cover?

Doing Business records the full sequence of procedures necessary for a business to purchase property from another business and transfer the property title to the buyer's name. The transaction is considered complete when it is opposable to third parties and when the buyer can use the property, use it as collateral for a bank loan or resell it. The ranking of economies on the ease of registering property is determined by sorting their distance to frontier scores for registering property. These scores are the simple average of the distance to frontier scores for each of the component indicators. To make the data comparable across economies, several assumptions about the parties to the transaction, the property and the procedures are used.

The parties (buyer and seller):

- Are limited liability companies, 100% domestically and privately owned and perform general commercial activities.
- Are located in the economy's largest business city².
- Have 50 employees each, all of whom are nationals.

The property (fully owned by the seller):

- Has a value of 50 times income per capita. The sale price equals the value.
- Is registered in the land registry or cadastre, or both, and is free of title disputes.
- Property will be transferred in its entirety.

WHAT THE REGISTERING PROPERTY INDICATORS MEASURE

Procedures to legally transfer title on immovable property (number)

Preregistration (for example, checking for liens, notarizing sales agreement, paying property transfer taxes)

Registration in the economy's largest business city²

Postregistration (for example, filing title with the municipality)

Time required to complete each procedure (calendar days)

Does not include time spent gathering information

Each procedure starts on a separate day. Procedures that can be fully completed online are recorded as ½ day.

Procedure considered completed once final document is received

No prior contact with officials

Cost required to complete each procedure (% of property value)

Official costs only, no bribes

No value added or capital gains taxes included

- Is located in a periurban commercial zone, and no rezoning is required.
- Has no mortgages attached, has been under the same ownership for the past 10 years.
- Consists of 557.4 square meters (6,000 square feet) of land and a 10-year-old, 2-story warehouse of 929 square meters (10,000 square feet). The warehouse is in good condition and complies with all safety standards, building codes and legal requirements. There is no heating system.

² For the 11 economies with a population of more than 100 million, data for a second city have been added.

REGISTERING PROPERTY

Where does the economy stand today?

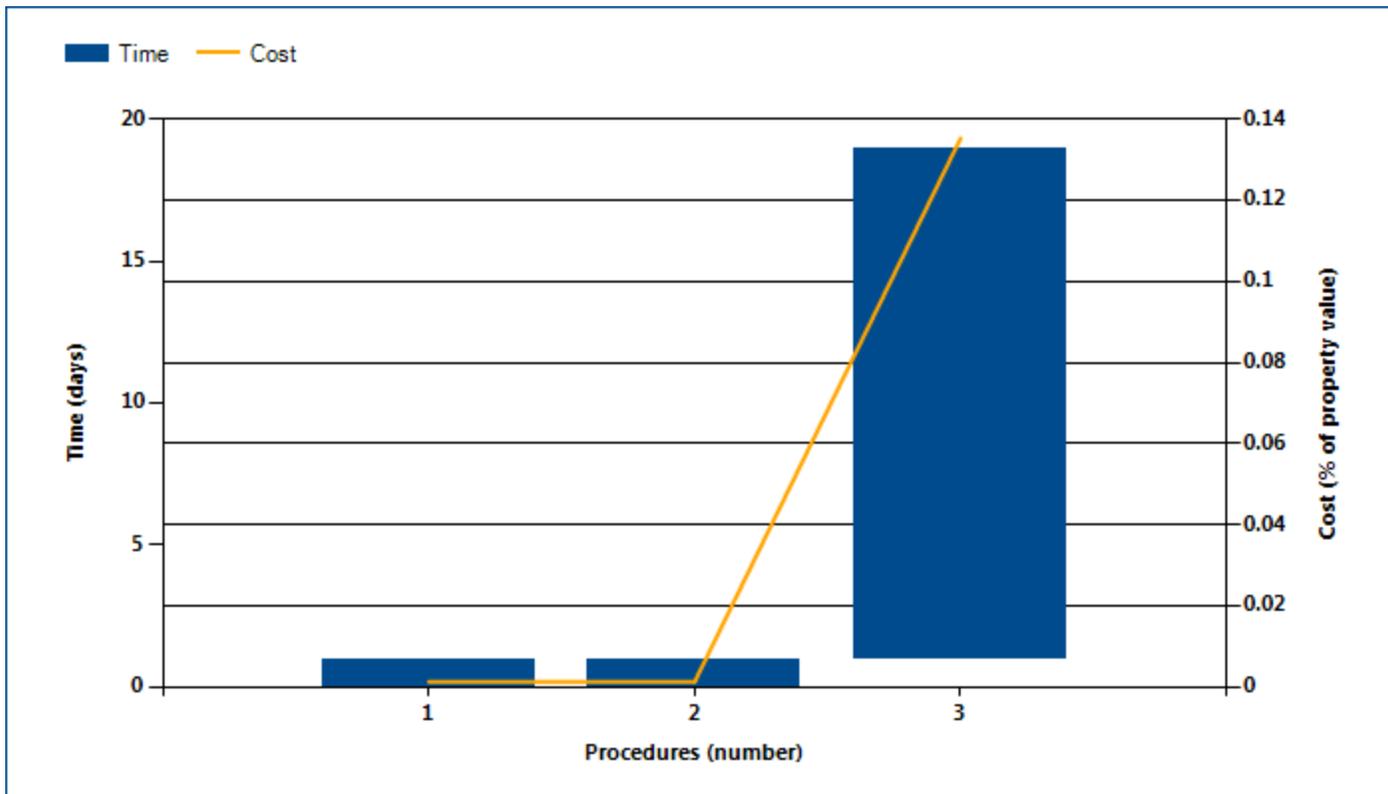

What does it take to complete a property transfer in Russian Federation? According to data collected by *Doing Business*, registering property there requires 3.0 procedures, takes 19.0 days and costs 0.1% of the property value (figure 5.1).

Most indicator sets refer to a case scenario in the largest business city of an economy, except for 11 economies for which the data are a population-weighted average of the 2 largest business cities. See the chapter on distance to frontier and ease of doing business ranking at the end of this profile for more details.

Figure 5.1 What it takes to register property in Russian Federation - Moscow

What it takes to register property in Russian Federation - Saint Petersburg

Note: Time shown in the figure above may not reflect simultaneity of procedures. Online procedures account for 0.5 days in the total time calculation. For more information on the methodology of the registering property indicators, see the *Doing Business* website (<http://www.doingbusiness.org>). For details on the procedures reflected here, see the summary at the end of this chapter. Source: *Doing Business* database.

REGISTERING PROPERTY

Globally, Russian Federation stands at 12 in the ranking of 189 economies on the ease of registering property (figure 5.2). The rankings for comparator economies and

the regional average ranking provide other useful information for assessing how easy it is for an entrepreneur in Russian Federation to transfer property.

Figure 5.2 How Russian Federation and comparator economies rank on the ease of registering property

Source: Doing Business database.

REGISTERING PROPERTY

Economies worldwide have been making it easier for entrepreneurs to register and transfer property—such as by computerizing land registries, introducing time limits for procedures and setting low fixed fees. Many have cut

the time required substantially—enabling buyers to use or mortgage their property earlier. What property registration reforms has *Doing Business* recorded in Russian Federation (table 5.1)?

Table 5.1 How has Russian Federation made registering property easier—or not?
By *Doing Business* report year from DB2010 to DB2015

DB year	Reform
DB2010	Russia reduced the time required to register property by introducing cadastral passports in place of the previously required inventory documents and cadastral maps.
DB2012	Russia made registering property transfers easier by eliminating the requirement to obtain cadastral passports on land plots.
DB2014	Russia made transferring property easier by streamlining procedures and implementing effective time limits for processing transfer applications.
DB2015	The Russian Federation made transferring property easier by eliminating the requirement for notarization and introducing tighter time limits for completing the property registration. This reform applies to both Moscow and St. Petersburg.

Note: For information on reforms in earlier years (back to DB2005), see the *Doing Business* reports for these years, available at <http://www.doingbusiness.org>.

Source: *Doing Business* database.

REGISTERING PROPERTY

What are the details?

The indicators reported here are based on a set of specific procedures—the steps that a buyer and seller must complete to transfer the property to the buyer’s name—identified by *Doing Business* through information collected from local property lawyers, notaries and property registries. These procedures are those that apply to a transaction matching the standard assumptions used by *Doing Business* in collecting the data (see the section in this chapter on what the indicators cover).

STANDARD PROPERTY TRANSFER	
Property value:	RUB 22,383,180
City:	Moscow, Saint Petersburg

The procedures, along with the associated time and cost, are summarized below.

Table 5.2 Summary of time, cost and procedures for registering property in Russian Federation

No.	Procedure	Time to complete	Cost to complete
1	<p>Buyer checks for encumbrances on property as the Federal Service for State Registration, Cadastre and Cartography</p> <p>Even though not mandatory by law, in practice most buyers do check for non-encumbrances on the property to prove the validity of the seller’s title. The complete information on the property (ownership rights, encumbrances) can be obtained by the Buyer in two ways with equal legal power of each. In a form of the official document provided by the authorized agency (Rosreestr) and in electronic format. According to the Federal Law №122 the registration authority upon the official request for information on a property shall provide an official hard copy document with all information available in the Unified State Register of Real Estate Property within five (5 working) days. Alternatively, checking and verification ownership rights of the seller can be performed on-line on the main web page of the Federal Service for State Registration, Cadastre and Cartography (www.rosreestr.ru).</p> <p><i>Agency: Federal Service of State Registration, Cadastre and Cartography (Rosreestr)</i></p>	<p>- Less than a day for obtaining an electronic document - 5 working days for a hard copy document (simultaneous with procedure 1 & 3)</p>	<p>RUB 600 (for a hard copy) and RUB 300 (as an electronic document); RUB 900 (for an extraterritorial request of a hard copy document (in another region)); RUB 400 (for an extraterritorial request of an electronic document).</p>
2	<p>* Check for legal status and current conditions of the buyer at the Unified State Register of Legal Entities</p> <p>Legal entities will obtain extracts from the Unified State Register of Legal Entities, officially managed and maintained by the Federal Tax Service (FNS) (http://egrul.nalog.ru/#). Although Russian legislation does not establish the term of validity for the extracts, in practice most state authorities accept the extracts issued not earlier than 30 days before their submission to the respective state authority.</p> <p><i>Agency: Unified State Register of Legal Entities</i></p>	<p>- Less than a day (online procedure) - Regular procedure - 5-7 days and - Expedited procedure - 1 working day(simultaneous with procedures</p>	<p>Electronic document - no charge. Official documents in hard copy - RUB 200 (regular procedure - 5-7 days) or RUB 400 (expedited procedure - 1 working day)</p>

No.	Procedure	Time to complete	Cost to complete
		1)	
3	<p>Apply for state registration of title transfer in the Unified State Register of Rights to Real Estat</p> <p>The Russian Federation adopted amendments to the Federal Law #122-FZ. New provisions of the Law came into effect on December 21, 2013 and shortened effective time limits for the title registration from a maximum of 20 calendar days to 18 calendar days. As a result of the implementation of this time limit in practice, entrepreneur can now transfer property at the State Cadastre of Immovable Property within 18 calendar days.</p> <p><i>Agency: Federal Service of State Registration, Cadastre and Cartography (Rosreestr)</i></p>	18 days	RUB 30,000: RUB 15,000 (building) + RUB 15,000 (land plot transfer)

* Takes place simultaneously with another procedure.

Note: Online procedures account for 0.5 days in the total time calculation.

Source: Doing Business database.

GETTING CREDIT

Two types of frameworks can facilitate access to credit and improve its allocation: credit information systems and borrowers and lenders in collateral and bankruptcy laws. Credit information systems enable lenders' rights to view a potential borrower's financial history (positive or negative)—valuable information to consider when assessing risk. And they permit borrowers to establish a good credit history that will allow easier access to credit. Sound collateral laws enable businesses to use their assets, especially movable property, as security to generate capital—while strong creditors' rights have been associated with higher ratios of private sector credit to GDP.

What do the indicators cover?

Doing Business assesses the sharing of credit information and the legal rights of borrowers and lenders with respect to secured transactions through 2 sets of indicators. The depth of credit information index measures rules and practices affecting the coverage, scope and accessibility of credit information available through a credit registry or a credit bureau. The strength of legal rights index measures whether certain features that facilitate lending exist within the applicable collateral and bankruptcy laws. *Doing Business* uses two case scenarios, Case A and Case B, to determine the scope of the secured transactions system, involving a secured borrower and a secured lender and examining legal restrictions on the use of movable collateral (for more details on each case, see the Data Notes section of the *Doing Business 2015* report). These scenarios assume that the borrower:

- Is a private limited liability company.
- Has its headquarters and only base of operations in the largest business city. For the 11 economies with a population of more than 100 million, data for a second city have been added.

WHAT THE GETTING CREDIT INDICATORS MEASURE

Strength of legal rights index (0–12)³

Rights of borrowers and lenders through collateral laws

Protection of secured creditors' rights through bankruptcy laws

Depth of credit information index (0–8)⁴

Scope and accessibility of credit information distributed by credit bureaus and credit registries

Credit bureau coverage (% of adults)

Number of individuals and firms listed in largest credit bureau as percentage of adult population

Credit registry coverage (% of adults)

Number of individuals and firms listed in credit registry as percentage of adult population

- Has up to 50 employees.
- Is 100% domestically owned, as is the lender.

The ranking of economies on the ease of getting credit is determined by sorting their distance to frontier scores for getting credit. These scores are the distance to frontier score for the strength of legal rights index and the depth of credit information index.

³ For the legal rights index, 2 new points are added in *Doing Business 2015* for new data collected to assess the overall legal framework for secured transactions and the functioning of the collateral registry.

⁴ For the credit information index, 2 new points are added in *Doing Business 2015* for new data collected on accessing borrowers' credit information online and availability of credit scores.

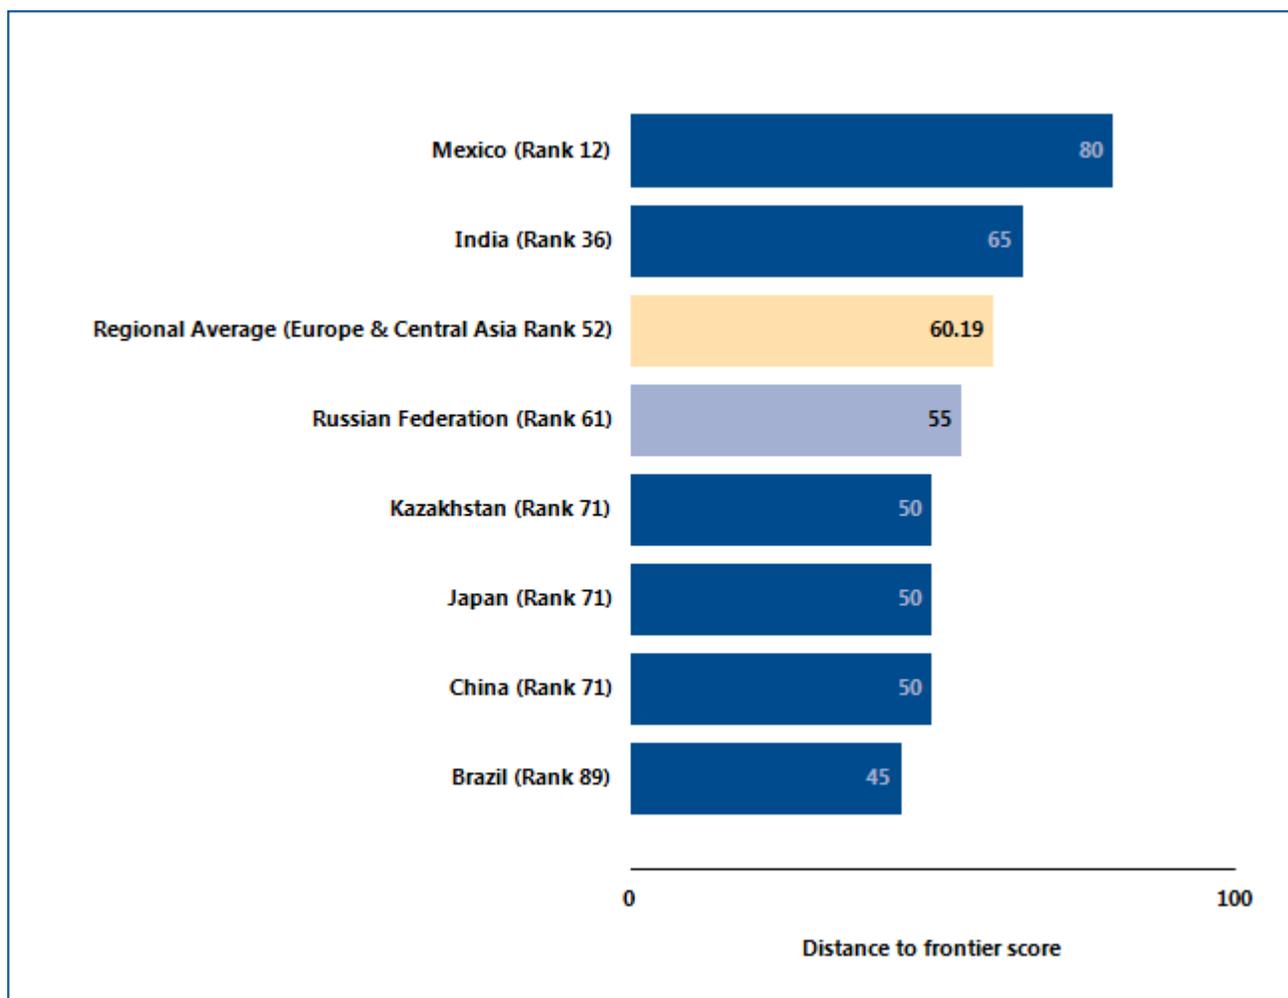

GETTING CREDIT

Where does the economy stand today?

How well do the credit information system and collateral and bankruptcy laws in Russian Federation facilitate access to credit? The economy has a score of 7 on the depth of credit information index and a score of 4 on the strength of legal rights index (see the summary of scoring at the end of this chapter for details). Higher scores indicate more credit information and stronger legal rights for borrowers and lenders.

Globally, Russian Federation stands at 61 in the ranking of 189 economies on the ease of getting credit (figure 6.1). The rankings for comparator economies and the regional average ranking provide other useful information for assessing how well regulations and institutions in Russian Federation support lending and borrowing.

Figure 6.1 How Russian Federation and comparator economies rank on the ease of getting credit

GETTING CREDIT

One way to put an economy’s score on the getting credit indicators into context is to see where the economy stands in the distribution of scores across economies. Figure 6.2 highlights the score on the strength of legal

rights index for Russian Federation and shows the scores for comparator economies as well as the regional average score. Figure 6.3 shows the same for the depth of credit information index.

Figure 6.2 How strong are legal rights for borrowers and lenders?

Economy scores on strength of legal rights index

Note: Higher scores indicate that collateral and bankruptcy laws are better designed to facilitate access to credit.
Source: Doing Business database.

Figure 6.3 How much credit information is shared—and how widely?

Economy scores on depth of credit information index

Note: Higher scores indicate the availability of more credit information, from either a credit registry or a credit bureau, to facilitate lending decisions. If the credit bureau or registry is not operational or covers less than 5% of the adult population, the total score on the depth of credit information index is 0.
Source: Doing Business database.

GETTING CREDIT

What are the details?

The getting credit indicators reported here for Russian Federation are based on detailed information collected in that economy. The data on credit information sharing are collected through a survey of a credit registry and/or credit bureau (if one exists). To construct the depth of credit information index, a score of 1 is assigned for each of 8 features of the credit registry or credit bureau (see summary of scoring below).

The data on the legal rights of borrowers and lenders are gathered through a survey of financial lawyers and verified through analysis of laws and regulations as well as public sources of information on collateral and bankruptcy laws. For the strength of legal rights index, a score of 1 is assigned for each of 10 aspects related to legal rights in collateral law and 2 aspects in bankruptcy law.

Strength of legal rights index (0–12)	Moscow Index score: 4	Saint Petersburg Index score: 4
Does an integrated or unified legal framework for secured transactions that extends to the creation, publicity and enforcement of functional equivalents to security interests in movable assets exist in the economy?	No	No
Does the law allow businesses to grant a non possessory security right in a single category of movable assets, without requiring a specific description of collateral?	No	No
Does the law allow businesses to grant a non possessory security right in substantially all of its assets, without requiring a specific description of collateral?	No	No
May a security right extend to future or after-acquired assets, and may it extend automatically to the products, proceeds or replacements of the original assets?	No	No
Is a general description of debts and obligations permitted in collateral agreements; can all types of debts and obligations be secured between parties; and can the collateral agreement include a maximum amount for which the assets are encumbered?	Yes	Yes
Is a collateral registry in operation for both incorporated and non-incorporated entities, that is unified geographically and by asset type, with an electronic database indexed by debtor's name?	No	No
Does a notice-based collateral registry exist in which all functional equivalents can be registered?	No	No
Does a modern collateral registry exist in which registrations, amendments, cancellations and searches can be performed online by any interested third party?	No	No
Are secured creditors paid first (i.e. before tax claims and employee claims) when a debtor defaults outside an insolvency procedure?	Yes	Yes

Strength of legal rights index (0–12)	Moscow Index score: 4	Saint Petersburg Index score: 4
Are secured creditors paid first (i.e. before tax claims and employee claims) when a business is liquidated?	Yes	Yes
Are secured creditors subject to an automatic stay on enforcement when a debtor enters a court-supervised reorganization procedure? Does the law protect secured creditors' rights by providing clear grounds for relief from the stay and/or sets a time limit for it?	No	No
Does the law allow parties to agree on out of court enforcement at the time a security interest is created? Does the law allow the secured creditor to sell the collateral through public auction and private tender, as well as, for the secured creditor to keep the asset in satisfaction of the debt?	Yes	Yes

Depth of credit information index (0–8)	Credit bureau	Credit registry	Index score: 7
Are data on both firms and individuals distributed?	Yes	No	1
Are both positive and negative credit data distributed?	Yes	No	1
Are data from retailers or utility companies - in addition to data from banks and financial institutions - distributed?	No	No	0
Are at least 2 years of historical data distributed? (Credit bureaus and registries that distribute more than 10 years of negative data or erase data on defaults as soon as they are repaid obtain a score of 0 for this component.)	Yes	No	1
Are data on loan amounts below 1% of income per capita distributed?	Yes	No	1
By law, do borrowers have the right to access their data in the credit bureau or credit registry?	Yes	No	1
Can banks and financial institutions access borrowers' credit information online (for example, through an online platform, a system-to-system connection or both)?	Yes	No	1
Are bureau or registry credit scores offered as a value-added service to help banks and financial institutions assess the creditworthiness of borrowers?	Yes	No	1

Note: Prior to *Doing Business 2015*, the depth of credit information index covered only the first 6 features listed above. An economy receives a score of 1 if there is a "yes" to either bureau or registry. If the credit bureau or registry is not operational or covers less than 5% of the adult population, the total score on the depth of credit information index is 0.

Coverage	Credit bureau (% of adults)	Credit registry (% of adults)
Number of firms	1,000,000	0
Number of individuals	65,000,000	0
Percent of total	64.6	0.0

PROTECTING MINORITY INVESTORS

Protecting minority investors matters for the ability of companies to raise the capital they need to grow, innovate, diversify and compete. Effective regulations define related-party transactions precisely, promote clear and efficient disclosure requirements, require shareholder participation in major decisions of the company and set detailed standards of accountability for company insiders.

What do the indicators cover?

Doing Business measures the protection of minority investors from conflicts of interest through one set of indicators and shareholders' rights in corporate governance through another. The ranking of economies on the strength of minority investor protections is determined by sorting their distance to frontier scores for protecting minority investors. These scores are the simple average of the distance to frontier scores for the extent of conflict of interest regulation index and the extent of shareholder governance index. To make the data comparable across economies, a case study uses several assumptions about the business and the transaction.

The business (Buyer):

- Is a publicly traded corporation listed on the economy's most important stock exchange (or at least a large private company with multiple shareholders).
- Has a board of directors and a chief executive officer (CEO) who may legally act on behalf of Buyer where permitted, even if this is not specifically required by law.

The transaction involves the following details:

- Mr. James, a director and the majority shareholder of the company, proposes that the company purchase used trucks from another company he owns.
- The price is higher than the going price for used trucks, but the transaction goes forward.
- All required approvals are obtained, and all required disclosures made, though the transaction is prejudicial to Buyer.
- Shareholders sue the interested parties and the members of the board of directors.

WHAT THE PROTECTING MINORITY INVESTORS INDICATORS MEASURE

Extent of disclosure index (0–10)

Review and approval requirements for related-party transactions ; Disclosure requirements for related-party transactions

Extent of director liability index (0–10)

Ability of minority shareholders to sue and hold interested directors liable for prejudicial related-party transactions; Available legal remedies (damages, disgorgement of profits, fines, imprisonment, rescission of the transaction)

Ease of shareholder suits index (0–10)

Access to internal corporate documents; Evidence obtainable during trial and allocation of legal expenses

Extent of conflict of interest regulation index (0–10)

Sum of the extent of disclosure, extent of director liability and ease of shareholder indices, divided by 3

Extent of shareholder rights index (0-10.5)

Shareholders' rights and role in major corporate decisions

Strength of governance structure index (0-10.5)

Governance safeguards protecting shareholders from undue board control and entrenchment

Extent of corporate transparency index (0-9)

Corporate transparency on ownership stakes, compensation, audits and financial prospects

Extent of shareholder governance index (0–10)

Sum of the extent of shareholders rights, strength of governance structure and extent of corporate transparency indices, divided by 3

Strength of investor protection index (0–10)

Simple average of the extent of conflict of interest regulation and extent of shareholder governance indices

PROTECTING MINORITY INVESTORS

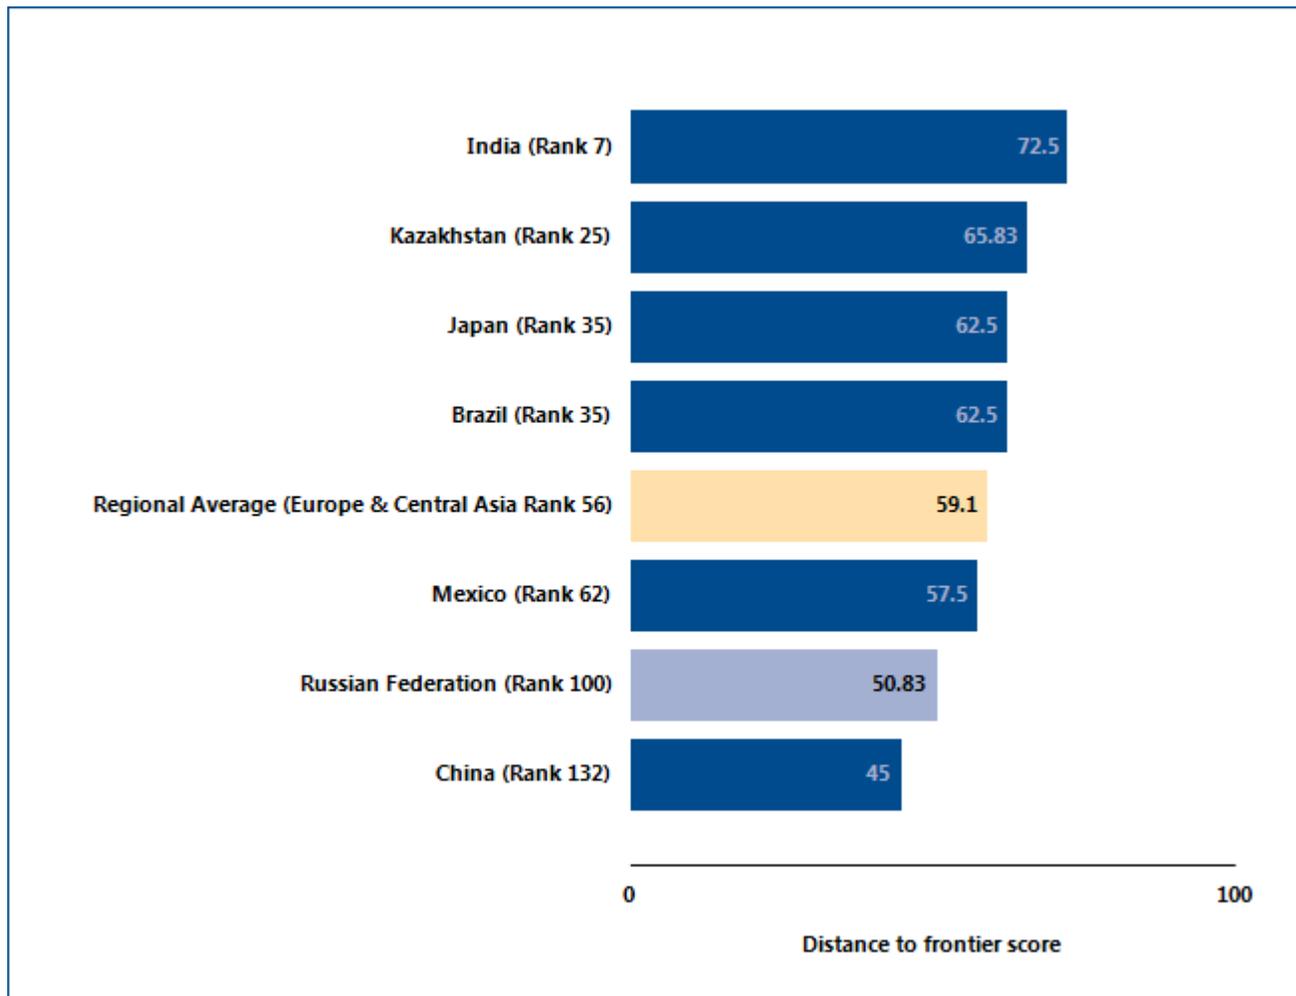

Where does the economy stand today?

How strong are minority investor protections against self-dealing in Russian Federation? The economy has a score of 5.1 on the strength of minority investor protection index, with a higher score indicating stronger protections.

Globally, Russian Federation stands at 100 in the ranking of 189 economies on the strength of minority investor

protection index (figure 7.1). While the indicator does not measure all aspects related to the protection of minority investors, a higher ranking does indicate that an economy's regulations offer stronger minority investor protections against self-dealing in the areas measured.

Figure 7.1 How Russian Federation and comparator economies perform on the strength of minority investor protection index

Source: Doing Business database.

PROTECTING MINORITY INVESTORS

One way to put an economy's scores on the protecting minority investors indicators into context is to see where the economy stands in the distribution of scores across comparator economies. Figures 7.2 through 7.7 highlight the scores on the various minority investor protection

indices for Russian Federation in 2014. A summary of scoring for the protecting minority investors indicators at the end of this chapter provides details on how the indices were calculated.

Figure 7.2 How extensive are disclosure requirements?

Extent of disclosure index (0-10)

Note: Higher scores indicate greater disclosure.

PROTECTING MINORITY INVESTORS

What are the details?

The protecting minority investors indicators reported here for Russian Federation are based on detailed information collected through a survey of corporate and securities lawyers about securities regulations, company laws and court rules of evidence and procedure. To construct the six indicators on minority investor protection, scores are assigned to each based on a range

of conditions relating to disclosure, director liability, shareholder suits, shareholder rights, governance structure and corporate transparency in a standard case study (for more details, see the Data Notes section of the *Doing Business 2015* report). The summary below shows the details underlying the scores for Russian Federation.

Table 7.2 Summary of scoring for the protecting minority investors indicators in Russian Federation

	Answer (Moscow)	Score (Moscow)	Answer (Saint Petersburg)	Score (Saint Petersburg)
Extent of disclosure index (0-10)		6.0		6.0
Which corporate body can provide legally sufficient approval for the Buyer-Seller transaction? (0-3)	Shareholders excluding interested parties	3	Shareholders excluding interested parties	3
Is disclosure by the interested director to the board of directors required? (0-2)	Existence of a conflict without any specifics	1	Existence of a conflict without any specifics	1
Is disclosure of the transaction in published periodic filings (annual reports) required? (0-2)	Disclosure on the transaction only	1	Disclosure on the transaction only	1
Is immediate disclosure of the transaction to the public and/or shareholders required? (0-2)	Disclosure on the transaction only	1	Disclosure on the transaction only	1
Must an external body review the terms of the transaction before it takes place? (0-1)	No	0	No	0
Extent of director liability index (0-10)		2.0		2.0
Can shareholders sue directly or derivatively for the damage caused by the Buyer-Seller transaction to the company? (0-1)	Yes	1	Yes	1
Can shareholders hold the interested director liable for the damage caused by the transaction to the company? (0-2)	Not liable	0	Not liable	0
Can shareholders hold members of the approving body liable for the damage caused by the transaction to the company? (0-2)	Liable if negligent	1	Liable if negligent	1
Must the interested director pay damages for the harm caused to the company upon a successful claim by a shareholder plaintiff? (0-1)	No	0	No	0
Must the interested director repay profits made from the transaction upon a successful claim by a shareholder plaintiff? (0-1)	No	0	No	0
Can both fines and imprisonment be applied against the interested director? (0-1)	No	0	No	0
Can a court void the transaction upon a successful claim by a shareholder plaintiff? (0-2)	Only in case of fraud or bad faith	0	Only in case of fraud or bad	0

			faith	
Ease of shareholder suits index (0-10)		7.0		7.0
Before filing suit, can shareholders owning 10% of the company's share capital inspect the transaction documents? (0-1)	No	0	No	0
Can the plaintiff obtain any documents from the defendant and witnesses during trial? (0-3)	Any relevant document	3	Any relevant document	3
Can the plaintiff request categories of documents from the defendant without identifying specific ones? (0-1)	No	0	No	0
Can the plaintiff directly question the defendant and witnesses during trial? (0-2)	Yes	2	Yes	2
Is the level of proof required for civil suits lower than that of criminal cases? (0-1)	Yes	1	Yes	1
Can shareholder plaintiffs recover their legal expenses from the company? (0-2)	Yes if successful	1	Yes if successful	1
Strength of minority investor protection index (0-10)		5.1		5.1
Extent of conflict of interest regulation index (0-10)		5.0		5.0
Extent of shareholder rights index (0-10.5)		7.5		7.5
Can shareholders amend company bylaws or statutes with a simple majority?	No	0	No	0
Can shareholders owning 10% of the company's share capital call for an extraordinary meeting of shareholders?	Yes	1.5	Yes	1.5
Can shareholders remove members of the board of directors before the end of their term.	Yes	1.5	Yes	1.5
Must a company obtain its shareholders' approval every time it issues new shares?	No	0	No	0
Are shareholders automatically granted subscription rights on new shares?	Yes	1.5	Yes	1.5
Must shareholders approve the election and dismissal of the external auditor?	Yes	1.5	Yes	1.5
Can shareholders freely trade shares prior to a major corporate action or meeting of shareholders?	Yes	1.5	Yes	1.5
Strength of governance structure index (0-10.5)		3.0		3.0
Is the CEO barred from also serving as chair of the board of directors?	No	0	No	0
Must the board of directors include independent board members?	No	0	No	0
Must a company have a separate audit committee?	No	0	No	0
Must changes to the voting rights of a series or class of shares be approved only by the holders of the affected shares?	No	0	No	0
Must a potential acquirer make a tender offer to all shareholders upon acquiring 50% of a company?	Yes	1.5	Yes	1.5
Is cross-shareholding between 2 independent companies limited to 10% of outstanding shares?	No	0	No	0
Is a subsidiary barred from acquiring shares issued by its parent company?	Yes	1.5	Yes	1.5
Extent of corporate transparency index (0-9)		5.0		5.0
Must ownership stakes representing 10% be disclosed?	No	0	No	0
Must information about board members' other directorships as well as basic information on their primary employment be disclosed?	Yes for listed companies	1	Yes for listed companies	1

Must the compensation of individual managers be disclosed?	No	0	No	0
Must financial statements contain explanatory notes on significant accounting policies, trends, risks, uncertainties and other factors influencing the reporting?	Yes	1.5	Yes	1.5
Must annual financial statements be audited by an external auditor?	Yes	1.5	Yes	1.5
Must audit reports be disclosed to the public?	Yes for listed companies	1	Yes for listed companies	1
Extent of shareholder governance index (0-10)		5.2		5.2

Source: Doing Business database.

PAYING TAXES

Taxes are essential. The level of tax rates needs to be carefully chosen—and needless complexity in tax rules avoided. Firms in economies that rank better on the ease of paying taxes in the *Doing Business* study tend to perceive both tax rates and tax administration as less of an obstacle to business according to the World Bank Enterprise Survey research.

What do the indicators cover?

Using a case scenario, *Doing Business* measures the taxes and mandatory contributions that a medium-size company must pay in a given year as well as the administrative burden of paying taxes and contributions. This case scenario uses a set of financial statements and assumptions about transactions made over the year. Information is also compiled on the frequency of filing and payments as well as time taken to comply with tax laws. The ranking of economies on the ease of paying taxes is determined by sorting their distance to frontier scores on the ease of paying taxes. These scores are the simple average of the distance to frontier scores for each of the component indicators, with a threshold and a nonlinear transformation applied to one of the component indicators, the total tax rate⁵. The financial statement variables have been updated to be proportional to 2012 income per capita; previously they were proportional to 2005 income per capita. To make the data comparable across economies, several assumptions are used.

- TaxpayerCo is a medium-size business that started operations on January 1, 2012.
- The business starts from the same financial position in each economy. All the taxes and mandatory contributions paid during the second year of operation are recorded.
- Taxes and mandatory contributions are measured at all levels of government.

⁵ The nonlinear distance to frontier for the total tax rate is equal to the distance to frontier for the total tax rate to the power of 0.8. The threshold is defined as the total tax rate at the 15th percentile of the overall distribution for all years included in the analysis. It is calculated and adjusted on a yearly basis. The threshold is not based on any economic theory of an “optimal tax rate” that minimizes distortions or maximizes efficiency in the tax system of an economy overall. Instead, it is mainly empirical in nature, set at the lower end of the distribution of tax rates levied on medium-size enterprises in the manufacturing sector as observed through the paying taxes indicators. This reduces the bias in the indicators toward economies that do not need to levy significant taxes on companies like the *Doing Business* standardized case study company because they raise public revenue in other ways—for example, through taxes on foreign companies, through taxes on sectors other than manufacturing or from natural resources (all of which are outside the scope of the methodology). This year’s threshold is 26.1%.

WHAT THE PAYING TAXES INDICATORS MEASURE

Tax payments for a manufacturing company in 2013 (number per year adjusted for electronic and joint filing and payment)

Total number of taxes and contributions paid, including consumption taxes (value added tax, sales tax or goods and service tax)

Method and frequency of filing and payment

Time required to comply with 3 major taxes (hours per year)

Collecting information and computing the tax payable

Completing tax return forms, filing with proper agencies

Arranging payment or withholding

Preparing separate tax accounting books, if required

Total tax rate (% of profit before all taxes)

Profit or corporate income tax

Social contributions and labor taxes paid by the employer

Property and property transfer taxes

Dividend, capital gains and financial transactions taxes

Waste collection, vehicle, road and other taxes

- Taxes and mandatory contributions include corporate income tax, turnover tax and all labor taxes and contributions paid by the company.
- A range of standard deductions and exemptions are also recorded.

PAYING TAXES

Where does the economy stand today?

What is the administrative burden of complying with taxes in Russian Federation—and how much do firms pay in taxes? On average, firms make 7.0 tax payments a year, spend 168.0 hours a year filing, preparing and paying taxes and pay total taxes amounting to 48.9% of profit (see the summary at the end of this chapter for details). Most indicator sets refer to a case scenario in the largest business city of an economy, except for 11 economies for which the data are a population-weighted

average of the 2 largest business cities. See the chapter on distance to frontier and ease of doing business ranking at the end of this profile for more details.

Globally, Russian Federation stands at 49 in the ranking of 189 economies on the ease of paying taxes (figure 8.1). The rankings for comparator economies and the regional average ranking provide other useful information for assessing the tax compliance burden for businesses in Russian Federation.

Figure 8.1 How Russian Federation and comparator economies rank on the ease of paying taxes

Source: Doing Business database.

PAYING TAXES

Economies around the world have made paying taxes faster and easier for businesses—such as by consolidating filings, reducing the frequency of payments or offering electronic filing and payment. Many have lowered tax rates. Changes have brought

concrete results. Some economies simplifying tax payment and reducing rates have seen tax revenue rise. What tax reforms has *Doing Business* recorded in Russian Federation (table 8.1)?

Table 8.1 How has Russian Federation made paying taxes easier—or not?
By *Doing Business* report year from DB2010 to DB2015

DB year	Reform
DB2010	Russia made paying taxes less costly for companies by reducing the corporate income tax rate.
DB2012	Russia increased the social security contribution rate for employers.
DB2013	Russia eased the administrative burden of taxes for firms by simplifying compliance procedures for value added tax and by promoting the use of tax accounting software and electronic services.

Note: For information on reforms in earlier years (back to DB2006), see the *Doing Business* reports for these years, available at <http://www.doingbusiness.org>.

Source: *Doing Business* database.

PAYING TAXES

What are the details?

The indicators reported here for Russian Federation are based on the taxes and contributions that would be paid by a standardized case study company used by *Doing Business* in collecting the data (see the section in this chapter on what the indicators cover). Tax practitioners are asked to review a set of financial statements as well as a standardized list of assumptions and transactions that the company completed during its 2nd year of operation. Respondents are asked how much taxes and mandatory contributions the business must pay and how these taxes are filed and paid.

LOCATION OF STANDARDIZED COMPANY

City: Moscow, Saint Petersburg

The taxes and contributions paid are listed in the summary below, along with the associated number of payments, time and tax rate.

Table 8.2 Summary of tax rates and administration

Moscow: Tax or mandatory contribution	Payments (number)	Notes on payments	Time (hours)	Statutory tax rate	Tax base	Total tax rate (% of profit)	Notes on total tax rate
Pension fund contribution	1	online filing	0	22%	gross salaries	24.1	
Corporate income tax	1	online filing	53	20%	taxable profits	8.4	
Federal obligatory medical insurance fund contributions	0	paid jointly	0	5.1%	gross salaries	5.4	
Property tax	1	online filing	0	2.2%	book value of property	4.7	
Social security insurance	1	online filing	76	2.9%	gross salaries	3.1	
Accidents tax	0	paid jointly	0	2.5%	gross salaries	2.8	
Land tax	1	online filing	0	0.3%-1.5%	cadastral value of the land plot	0.5	

Moscow: Tax or mandatory contribution	Payments (number)	Notes on payments	Time (hours)	Statutory tax rate	Tax base	Total tax rate (% of profit)	Notes on total tax rate
Transport tax	1	online filing	0	various rates	engine capacity of vehicles	0.1	
Value Added Tax	1	online filing	39	18%	value added	0	not included
Personal income tax	0	paid jointly	0	13%	gross salaries	0	withheld
Totals	7.0		168.0			49.0	

Saint Petersburg: Tax or mandatory contribution	Payments (number)	Notes on payments	Time (hours)	Statutory tax rate	Tax base	Total tax rate (% of profit)	Notes on total tax rate

TRADING ACROSS BORDERS

In today's globalized world, making trade between economies easier is increasingly important for business. Excessive document requirements, burdensome customs procedures, inefficient port operations and inadequate infrastructure all lead to extra costs and delays for exporters and importers, stifling trade potential. Research shows that exporters in developing countries gain more from a 10% drop in their trading costs than from a similar reduction in the tariffs applied to their products in global markets.

What do the indicators cover?

Doing Business measures the time and cost (excluding tariffs and the time and cost for sea transport) associated with exporting and importing a standard shipment of goods by sea transport, and the number of documents necessary to complete the transaction. The indicators cover predefined stages such as documentation requirements and procedures at customs and other regulatory agencies as well as at the port. They also cover trade logistics, including the time and cost of inland transport to the largest business city. The ranking of economies on the ease of trading across borders is determined by sorting their distance to frontier scores for trading across borders. These scores are the simple average of the distance to frontier scores for each of the component indicators. To make the data comparable across economies, *Doing Business* uses several assumptions about the business and the traded goods.

The business:

- Is located in the economy's largest business city. For the 11 economies with a population of more than 100 million, data for a second city have been added.
- Is a private, limited liability company, domestically owned and does not operate with special export or import privileges.
- Conducts export and import activities, but does not have any special accreditation such as an authorized economic operator status.

WHAT THE TRADING ACROSS BORDERS INDICATORS MEASURE

Documents required to export and import (number)

- Bank documents
- Customs clearance documents
- Port and terminal handling documents
- Transport documents

Time required to export and import (days)

- Obtaining, filling out and submitting all the documents
- Inland transport and handling
- Customs clearance and inspections
- Port and terminal handling
- Does not include sea transport time

Cost required to export and import (US\$ per container)

- All documentation
- Inland transport and handling
- Customs clearance and inspections
- Port and terminal handling
- Official costs only, no bribes

The traded product:

- Is not hazardous nor includes military items.
- Does not require refrigeration or any other special environment.
- Do not require any special phytosanitary or environmental safety standards other than accepted international standards.
- Is one of the economy's leading export or import products.
- Is transported in a dry-cargo, 20-foot full container load.

TRADING ACROSS BORDERS

Where does the economy stand today?

What does it take to export or import in Russian Federation? According to data collected by *Doing Business*, exporting a standard container of goods requires 9 documents, takes 21.1 days and costs \$2400.5. Importing the same container of goods requires 10 documents, takes 19.4 days and costs \$2594.5 (see the summary of four predefined stages and documents at the end of this chapter for details). Most indicator sets refer to a case scenario in the largest business city of an economy, except for 11 economies for which the data

are a population-weighted average of the 2 largest business cities. See the chapter on distance to frontier and ease of doing business ranking at the end of this profile for more details.

Globally, Russian Federation stands at 155 in the ranking of 189 economies on the ease of trading across borders (figure 9.1). The rankings for comparator economies and the regional average ranking provide other useful information for assessing how easy it is for a business in Russian Federation to export and import goods.

Figure 9.1 How Russian Federation and comparator economies rank on the ease of trading across borders

Source: *Doing Business* database.

TRADING ACROSS BORDERS

In economies around the world, trading across borders as measured by *Doing Business* has become faster and easier over the years. Governments have introduced tools to facilitate trade—including single windows, risk-based inspections and electronic data interchange

systems. These changes help improve the trading environment and boost firms' international competitiveness. What trade reforms has *Doing Business* recorded in Russian Federation (table 9.1)?

Table 9.1 How has Russian Federation made trading across borders easier—or not?
By *Doing Business* report year from DB2010 to DB2015

DB year	Reform
DB2012	Russia made trading across borders easier by reducing the number of documents needed for each export or import transaction and lowering the associated cost.
DB2014	Russia made trading across borders easier by implementing an electronic system for submitting export and import documents and by reducing the number of physical inspections.

Note: For information on reforms in earlier years (back to DB2006), see the *Doing Business* reports for these years, available at <http://www.doingbusiness.org>.

Source: *Doing Business* database.

TRADING ACROSS BORDERS

What are the details?

The indicators reported here for Russian Federation are based on a set of specific predefined stages for trading a standard shipment of goods by ocean transport (see the section in this chapter on what the indicators cover). Information on the required documents and the time and cost to complete export and import is collected from local freight forwarders, shipping lines, customs brokers, port officials and banks.

LOCATION OF STANDARDIZED COMPANY

Port Name - Moscow: St. Petersburg (First container terminal)

Port Name - Saint Petersburg: St. Petersburg (First container terminal)

City: Moscow, Saint Petersburg

The predefined stages, and the associated time and cost, for exporting and importing a standard shipment of goods are listed in the summary below, along with the required documents.

Stages to export	Moscow		Saint Petersburg	
	Time (days)	Cost (US\$)	Time (days)	Cost (US\$)
Customs clearance and inspections	1	550	1	550
Documents preparation	13	290	12	360
Inland transportation and handling	5	1,385	3	300
Ports and terminal handling	3	480	3	480
Totals	22	2,705	19	1,690

Stages to import	Moscow		Saint Petersburg	
	Time (days)	Cost (US\$)	Time (days)	Cost (US\$)
Customs clearance and inspections	1	650	1	650
Documents preparation	12	335	12	335
Inland transportation and handling	5	1,385	3	300
Ports and terminal handling	2	550	2	550
Totals	20	2,920	18	1,835

Documents to export

Acceptance order (priemnii akt)
Bill of lading (konosament)
Commercial Invoice (schet-faktura)
Consignment note/ CMR (tovarno-transportnaya nakladnaya)
Customs export declaration (tamojennaya deklaraciya)
Declaration of origin (Statement of manufacturer - zayavlenie proizvoditelya)/ Certificate of Origin
Export/loading order (eksportnoe/pogruzochnoe poruchenie)
Packing List (upakovochnii list)
Sales purchase contract (dogovor kupli-prodaji/kontrakt)

Documents to import

ENFORCING CONTRACTS

Effective commercial dispute resolution has many benefits. Courts are essential for entrepreneurs because they interpret the rules of the market and protect economic rights. Efficient and transparent courts encourage new business relationships because businesses know they can rely on the courts if a new customer fails to pay. Speedy trials are essential for small enterprises, which may lack the resources to stay in business while awaiting the outcome of a long court dispute.

What do the indicators cover?

Doing Business measures the efficiency of the judicial system in resolving a commercial dispute before local courts. Following the step-by-step evolution of a standardized case study, it collects data relating to the time, cost and procedural complexity of resolving a commercial lawsuit. The ranking on the ease of enforcing contracts is the simple average of the percentile rankings on its component indicators: procedures, time and cost.

The dispute in the case study involves the breach of a sales contract between 2 domestic businesses. The case study assumes that the court hears an expert on the quality of the goods in dispute. This distinguishes the case from simple debt enforcement. To make the data comparable across economies, *Doing Business* uses several assumptions about the case:

- The seller and buyer are located in the economy's largest business city. For the 11 economies with a population of more than 100 million, data for a second city have been added.
- The buyer orders custom-made goods, then fails to pay.
- The seller sues the buyer before a competent court.
- The value of the claim is 200% of the income per capita or the equivalent in local currency of USD 5,000, whichever is greater.
- The seller requests a pretrial attachment to secure the claim.
- The dispute on the quality of the goods requires an expert opinion.
- The judge decides in favor of the seller; there is no appeal.
- The seller enforces the judgment through a public sale of the buyer's movable assets.

WHAT THE ENFORCING CONTRACTS

INDICATORS MEASURE

Procedures to enforce a contract through the courts (number)

- Steps to file and serve the case
- Steps for trial and judgment
- Steps to enforce the judgment

Time required to complete procedures (calendar days)

- Time to file and serve the case
- Time for trial and obtaining judgment
- Time to enforce the judgment

Cost required to complete procedures (% of claim)

- Average attorney fees
- Court costs
- Enforcement costs

ENFORCING CONTRACTS

Where does the economy stand today?

How efficient is the process of resolving a commercial dispute through the courts in Russian Federation? According to data collected by *Doing Business*, contract enforcement takes 267.0 days, costs 14.9% of the value of the claim and requires 35.0 procedures (see the summary at the end of this chapter for details). Most indicator sets refer to a case scenario in the largest business city of an economy, except for 11 economies for which the data are a population-weighted average of the

2 largest business cities. See the chapter on distance to frontier and ease of doing business ranking at the end of this profile for more details.

Globally, Russian Federation stands at 14 in the ranking of 189 economies on the ease of enforcing contracts (figure 10.1). The rankings for comparator economies and the regional average ranking provide other useful benchmarks for assessing the efficiency of contract enforcement in Russian Federation.

Figure 10.1 How Russian Federation and comparator economies rank on the ease of enforcing contracts

Source: *Doing Business* database.

ENFORCING CONTRACTS

Economies in all regions have improved contract enforcement in recent years. A judiciary can be improved in different ways. Higher-income economies tend to look for ways to enhance efficiency by introducing new technology. Lower-income economies often work on

reducing backlogs by introducing periodic reviews to clear inactive cases from the docket and by making procedures faster. What reforms making it easier (or more difficult) to enforce contracts has *Doing Business* recorded in Russian Federation (table 10.1)?

Table 10.1 How has Russian Federation made enforcing contracts easier—or not?

By *Doing Business* report year from DB2010 to DB2015

DB year	Reform
DB2012	Russia made filing a commercial case easier by introducing an electronic case filing system.

Note: For information on reforms in earlier years (back to DB2005), see the *Doing Business* reports for these years, available at <http://www.doingbusiness.org>.

Source: *Doing Business* database.

ENFORCING CONTRACTS

What are the details?

The indicators reported here for Russian Federation are based on a set of specific procedural steps required to resolve a standardized commercial dispute through the courts (see the section in this chapter on what the indicators cover). These procedures, and the time and cost of completing them, are identified through study of the codes of civil procedure and other court regulations, as well as through questionnaires completed by local litigation lawyers (and, in a quarter of the economies covered by *Doing Business*, by judges as well).

COURT NAME	
Claim value - Moscow:	RUB 843,258
Claim value - Saint Petersburg:	RUB 843,258
Court name - Moscow:	Moscow Arbitrazh Court
Court name - Saint Petersburg:	Commercial (Arbitrazh) Court of St. Petersburg and Leningard
City:	Moscow, Saint Petersburg

Table 10.2 Summary of time, cost and procedures for enforcing a contract in Russian Federation

Indicator	Moscow	Saint Petersburg	Europe & Central Asia average
Time (days)	270	260	448
Filing and service	30	30	
Trial and judgment	160	150	
Enforcement of judgment	80	80	
Cost (% of claim)	13.4	18.4	25.2
Attorney cost (% of claim)	10	15	
Court cost (% of claim)	3.4	3.4	
Enforcement Cost (% of claim)	0	0	
Procedures (number)	35	35	37
Number of procedures (without bonus points)	36	36	
Specialized commercial courts	-1	-1	

Indicator	Moscow	Saint Petersburg	Europe & Central Asia average
Total number of procedures (including bonus points)	35	35	

No.	Moscow Procedures
	Filing and service:
1	Plaintiff requests payment: Plaintiff or his lawyer asks Defendant orally or in writing to comply with the contract.
2	Plaintiff hires a lawyer: Plaintiff hires a lawyer.
*	Plaintiff files a summons and complaint: Plaintiff files a summons and complaint with the court (orally or in writing).
*	Plaintiff pays court fees: Plaintiff pays court fees (e.g. court duties, stamp duties, or any other type of court fees). Answer 'yes' even if Plaintiff recovers these costs.
3	Registration of court case: Registration of court case by the court administration (this can include assigning a reference number to the case).
*	Assignment of court case to a judge: Assignment of court case to a judge (through a random procedure, automated system, ruling of an administrative judge, court officer, etc).
4	Judicial scrutiny of summons and complaint: Judge examines Plaintiff's summons and complaint for formal requirements as a matter of law or standard practice.
*	Judge admits summons and complaint: Judge admits summons and complaint (after verifying the formal requirements).
5	Attempt at physical delivery: An attempt to physically deliver summons and complaint to Defendant is made.
*	Proof of service: Plaintiff submits proof of service to court, as required by law or standard practice.
*	Application for pre-judgment attachment: Plaintiff submits an application in writing for the attachment of Defendant's property prior to judgment.
*	Decision on pre-judgment attachment: Judge decides whether to grant Plaintiff's request for pre-judgment attachment of Defendant's property and notifies Plaintiff and Defendant of the decision.
6	Pre-judgment attachment order: Defendant's property is attached prior to judgment. Attachment order either involves physical attachment, or is achieved by freezing, registering, marking, or otherwise separating and restricting Defendant's movement of specific moveable assets.
7	Custody of assets attached prior to judgment: If physical attachment is ordered, Defendant's attached assets are placed in the custody or control of an enforcement officer or private bailiff.
8	Report on pre-judgment attachment: Court enforcement officer or private bailiff issues and delivers a report on the attachment of Defendant's property to the judge.
	Trial and judgment:
*	Defendant files preliminary objections.: Defendant presents preliminary objections to the court. (Preliminary exemptions differ from answers on the merits. Examples of preliminary motions are motions to dismiss on the basis of the statute of limitations or jurisdictional objections, etc.) Checke

No.	Moscow Procedures
*	Plaintiff's answer to preliminary motions: Plaintiff responds to preliminary motions raised by Defendant. Checked as 'yes' if preliminary motions are commonly raised (step 30) and if Plaintiff responds to them immediately.
9	Judge's resolution on preliminary objections: Judge decides on preliminary objections separately from the merits of the case. Checked as 'yes' if preliminary objections are commonly made (step 30) and if judge resolves the question before rendering his decision.
10	Defendant files an answer to Plaintiff's claim: Defendant files a written pleading which includes his answer or defense on the merits of the case (see assumption 4).
11	Plaintiff's written reply to Defendant's answer: Plaintiff responds to Defendant's answer with a written pleading, which may or may not include witness statements or expert (witness) statements.
12	Filing of written submissions: Plaintiff and Defendant file written pleadings and submissions with the court and transmit copies of the written pleadings or submissions to one another. The pleadings may or may not include witness statements or expert (witness) statements.
13	Adjournments: Court procedure is delayed because one or both parties request and obtain an adjournment to submit written pleadings. Check as 'yes' if this commonly happens.
*	Court appointment of independent expert: Judge appoints, either at the parties' request or at his own initiative, an independent expert to decide whether the quality of the goods Plaintiff delivered to Defendant is adequate. (see assumption 5-b).
14	Notification of court-appointment of independent expert: The court notifies both parties that the court is appointing an independent expert (see assumption 5-b).
*	Delivery of expert report by court-appointed expert: The independent expert, appointed by the court, delivers his or her expert report to the court (see assumption 5-b).
*	Setting of date for mediation hearing: The judge sets a date for a mediation hearing, sometimes also called a 'pre-trial conference,' and notifies the parties of the hearing date.
*	Setting of date(s) for oral hearing or trial: Judge sets the date(s) for the oral hearing or trial.
15	Preliminary hearing aimed at preparing for the oral hearing: The judge meets the parties to make practical arrangements for the oral hearing on the merits of the case.
*	List of (expert) witnesses: The parties file a list of (expert) witnesses with the court (see assumption 5-a).
16	Summoning of (expert) witnesses: The court summons (expert) witnesses to appear in court for the oral hearing or trial (see assumption 5-a).
17	Adjournments: Court proceedings are delayed because one or both parties request and obtain an adjournment to prepare for the oral hearing or trial as a matter of common practice.
18	Oral hearing (prevalent in civil law): The parties argue the merits of the case at an oral hearing before the judge. Witnesses and a court-appointed independent expert may be heard and questioned at the oral hearing.
19	Adjournments: Court proceedings are delayed because one or both parties request and obtain an adjournment during the oral hearing or trial, resulting in an additional or later trial or hearing date.

No.	Moscow Procedures
*	Final arguments: The parties present their final factual and legal arguments to the court either by oral presentation or by a written submission.
20	Judgment date: The judge sets a date for delivery of the judgment.
21	Notification of judgment in court: The parties are notified of the judgment at a court hearing.
22	Writing of judgment: The judge produces a written copy of the judgment.
23	Registration of judgment: The court office registers the judgment after receiving a written copy of the judgment.
24	Court notification of availability of the written judgment: The court notifies the parties that the written judgment is available at the courthouse.
25	Plaintiff receives a copy of the judgment: Plaintiff receives a copy of the written judgment which is 100% in favor of Plaintiff (see assumption 6).
26	Appeal period: By law Defendant has the opportunity to appeal the judgment during a specified period. Defendant decides not to appeal. Seller decides to start enforcing the judgment when the appeal period ends (see assumption 8).
27	Order for reimbursement by Defendant of Plaintiff's court fees: The judgment orders Defendant to reimburse Plaintiff for the court fees Plaintiff has advanced, because Defendant has lost the case.
	Enforcement of judgment:
28	Plaintiff retains an enforcement agent to enforce the judgment.: Plaintiff retains the services of a court enforcement officer such as a court bailiff or sheriff, or a private bailiff.
29	Publication of judgment: The judgment is published in an official journal, gazette or local newspaper.
*	Plaintiff requests an enforcement order: Plaintiff applies to the court to obtain the enforcement order ('seal' on judgment).
30	Attachment of enforcement order to judgment: The judge attaches the enforcement order ('seal') to the judgment.
*	Delivery of enforcement order: The court's enforcement order is delivered to a court enforcement officer or a private bailiff.
*	Plaintiff's request for physical enforcement: As Plaintiff commonly fears that Defendant might physically resist the taking into custody of its previously attached movable assets, Plaintiff requests the judge or the police authorities to obtain police assistance during the physical enforcement of the
31	Request to Defendant to comply voluntarily with judgment: Plaintiff, a court enforcement officer or a private bailiff requests Defendant to voluntarily comply with the judgment.
32	Identification of Defendant's assets by court official or Defendant for purposes of enforcement: The judge, a court enforcement officer, a private bailiff or the Defendant himself identifies Defendant's movable assets for the purposes of enforcing the judgment through a sale of Defendant's assets.
33	Attachment: Defendant's movable goods are attached (physically or by registering, marking or separating assets).

No.	Moscow Procedures
34	Valuation or appraisal of attached movable goods: The court or court-appointed valuation expert evaluates the attached goods.
35	Sale through public auction: The Defendant's movable property is sold at public auction.
36	Payment: Court orders that the proceeds of the public auction or the direct sale be delivered to Plaintiff.

No.	Saint Petersburg Procedures
	Filing and service:

* Not counted in the total number of procedures.

RESOLVING INSOLVENCY

A robust bankruptcy system functions as a filter, ensuring the survival of economically efficient companies and reallocating the resources of inefficient ones. Fast and cheap insolvency proceedings result in the speedy return of businesses to normal operation and increase returns to creditors. By improving the expectations of creditors and debtors about the outcome of insolvency proceedings, well-functioning insolvency systems can facilitate access to finance, save more viable businesses and thereby improve growth and sustainability in the economy overall.

What do the indicators cover?

Doing Business studies the time, cost and outcome of insolvency proceedings involving domestic legal entities. These variables are used to calculate the recovery rate, which is recorded as cents on the dollar recouped by secured creditors through reorganization, liquidation or debt enforcement (foreclosure) proceedings. To determine the present value of the amount recovered by creditors, *Doing Business* uses the lending rates from the International Monetary Fund, supplemented with data from central banks and the Economist Intelligence Unit.

In addition, *Doing Business* evaluates the adequacy and integrity of the existing legal framework applicable to liquidation and reorganization proceedings through the strength of insolvency framework index. The index tests whether economies adopted internationally accepted good practices in four areas: commencement of proceedings, management of debtor's assets, reorganization proceedings and creditor participation.

The ranking of the Resolving Insolvency indicator is based on the recovery rate and the total score of the strength of insolvency framework index. The Resolving Insolvency indicator does not measure insolvency proceedings of individuals and financial institutions. The data are derived from survey responses by local insolvency practitioners and verified through a study of laws and regulations as well as public information on bankruptcy systems.

WHAT THE RESOLVING INSOLVENCY INDICATORS MEASURE

Time required to recover debt (years)

Measured in calendar years

Appeals and requests for extension are included

Cost required to recover debt (% of debtor's estate)

Measured as percentage of estate value

Court fees

Fees of insolvency administrators

Lawyers' fees

Assessors' and auctioneers' fees

Other related fees

Outcome

Whether business continues operating as a going concern or business assets are sold piecemeal

Recovery rate for creditors

Measures the cents on the dollar recovered by secured creditors

Outcome for the business (survival or not) determines the maximum value that can be recovered

Official costs of the insolvency proceedings are deducted

Depreciation of furniture is taken into account

Present value of debt recovered

Strength of insolvency framework index (0-16)

Sum of the scores of four component indices:

Commencement of proceedings index (0-3)

Management of debtor's assets index (0-6)

Reorganization proceedings index (0-3)

Creditor participation index (0-4)

RESOLVING INSOLVENCY

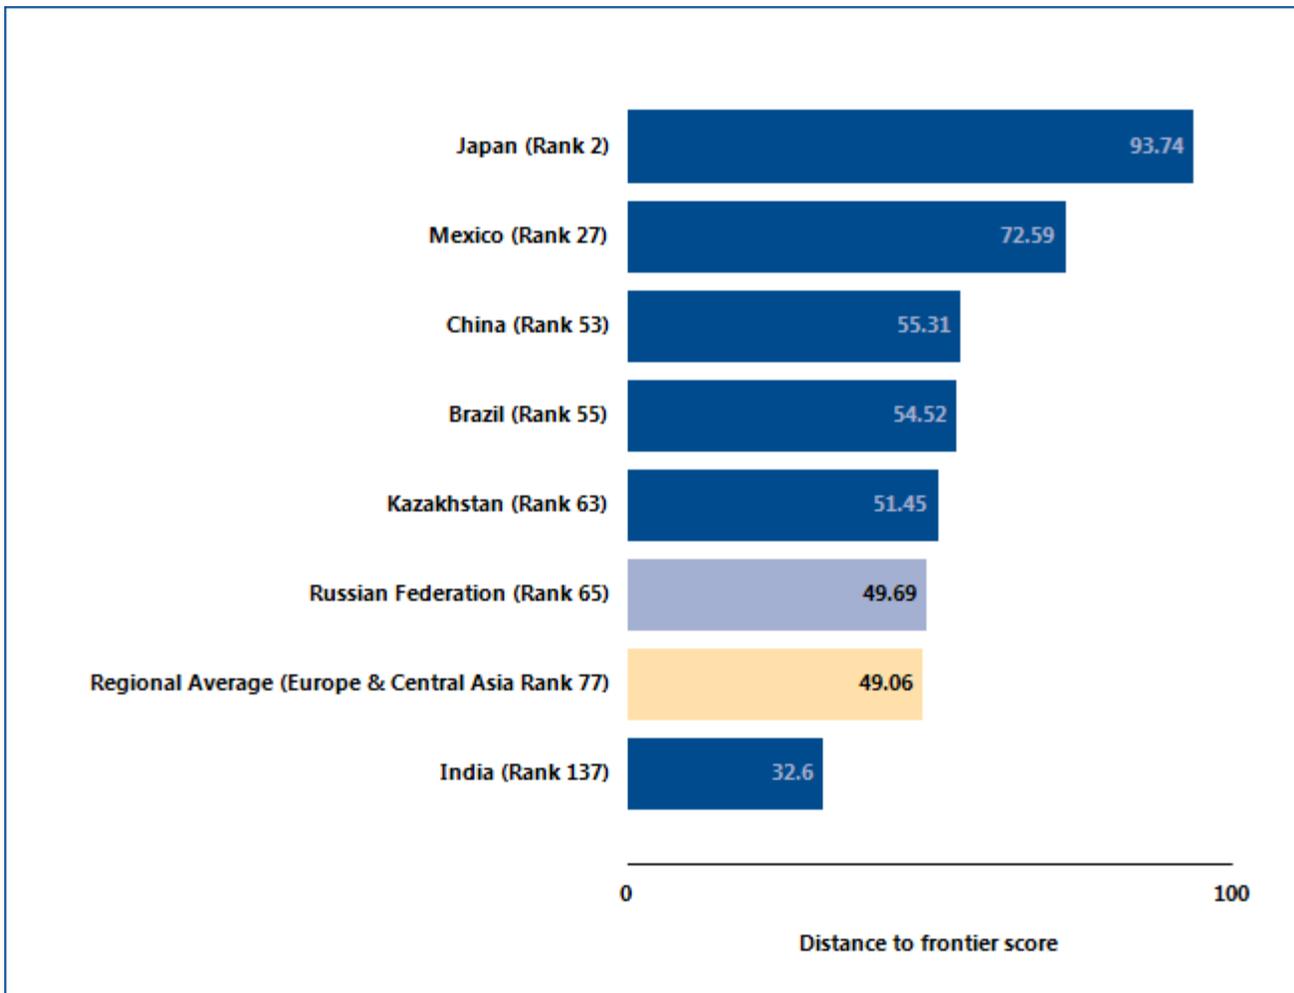

Where does the economy stand today?

Combination of quality regulations and efficient practice characterize the top-performing economies. How efficient are insolvency proceedings in Russian Federation? According to data collected by *Doing Business*, resolving insolvency takes 2.0 years on average and costs 9.0% of the debtor's estate, with the most likely outcome being that the company will be sold as piecemeal sale. The average recovery rate is 43.0 cents on the dollar. Most indicator sets refer to a case scenario in the largest business city of an economy, except for 11 economies for which the data are a population-weighted average of the 2 largest business cities. See the chapter on distance to frontier and ease of doing business ranking at the end of this profile for more details.

According to data collected by *Doing Business*, Russian Federation scores 2.5 out of 3 points on the commencement of proceedings index, 3.5 out of 6 points on the management of debtor's assets index, 0.5 out of 3 points on the reorganization proceedings index, and 2.0 out of 4 points on the creditor participation index. Russian Federation's total score on the strength of insolvency framework index is 8.5 out of 16.

Globally, Russian Federation stands at 65 in the ranking of 189 economies on the ease of resolving insolvency (figure 11.1). The rankings for comparator economies and the regional average ranking provide other useful benchmarks for assessing the efficiency of insolvency proceedings in Russian Federation.

RESOLVING INSOLVENCY

A well-balanced bankruptcy system distinguishes companies that are financially distressed but economically viable from inefficient companies that should be liquidated. But in some insolvency systems even viable businesses are liquidated. This is starting to

change. Many recent reforms of bankruptcy laws have been aimed at helping more of the viable businesses survive. What insolvency reforms has *Doing Business* recorded in Russian Federation (table 11.1)?

Table 11.1 How has Russian Federation made resolving insolvency easier—or not?

By *Doing Business* report year from DB2010 to DB2015

DB year	Reform
DB2010	Russia enhanced its insolvency process by introducing several changes to its insolvency law to speed up the liquidation procedure and strengthen the legal status of secured creditors.
DB2011	Russia introduced a series of legislative measures in 2009 to improve creditor rights and the insolvency system.

Note: For information on reforms in earlier years (back to DB2005), see the *Doing Business* reports for these years, available at <http://www.doingbusiness.org>.

Source: *Doing Business* database.

LABOR MARKET REGULATION

Doing Business measures flexibility in the regulation of employment, specifically as it affects the hiring and redundancy of workers and the rigidity of working hours. This year, for the first time, the indicators measuring flexibility in labor market regulations focus on those affecting the food retail industry, using a standardized case study of a cashier in a supermarket. Also new is that *Doing Business* collects data on regulations applying to employees hired through temporary-work agencies as well as on those applying to permanent employees or employees hired on fixed-term contracts. The indicators also cover additional areas of labor market regulation, including social protection schemes and benefits as well as labor disputes.

Over the period from 2007 to 2011 improvements were made to align the methodology for the labor market regulation indicators (formerly the employing workers indicators) with the letter and spirit of the International Labour Organization (ILO) conventions. Only 6 of the 188 ILO conventions cover areas measured by *Doing Business*: employee termination, weekend work, holiday with pay, night work, protection against unemployment and medical care and sickness benefits. The *Doing Business* methodology is fully consistent with these 6 conventions. The ILO conventions covering areas related to the labor market regulation indicators do not include the ILO core labor standards—8 conventions covering the right to collective bargaining, the elimination of forced labor, the abolition of child labor and equitable treatment in employment practices.

Between 2009 and 2011 the World Bank Group worked with a consultative group—including labor lawyers, employer and employee representatives, and experts from the ILO, the Organisation for Economic Co-operation and Development (OECD), civil society and the private sector—to review the methodology for the labor market regulation indicators and explore future areas of research.

A full report with the conclusions of the consultative group is available at:
<http://www.doingbusiness.org/methodology/employing-workers>.

Doing Business 2015 presents the data for the labor market regulation indicators in an annex. The report does not present rankings of economies on these indicators nor include the topic in the aggregate distance to frontier score or ranking on the ease of doing business. Detailed data collected on labor market regulations are available on the *Doing Business* website (<http://www.doingbusiness.org>). The data on labor market regulations are based on a detailed survey of employment regulations that is completed by local lawyers and public officials. Employment laws and regulations as well as secondary sources are reviewed to ensure accuracy. To make the data comparable across economies, several assumptions about the worker and the business are used.

The worker:

- Is a cashier in a supermarket or a grocery store
- Is a full-time employee
- Is not a member of the labor union, unless membership is mandatory

The business:

- Is a limited liability company (or the equivalent in the economy) with 60 employees.
- Operates a supermarket or grocery store in the economy's largest business city. For 11 economies the data are also collected for the second largest business city.
- Is subject to collective bargaining agreements if such agreements cover more than 50% of the food retail sector and they apply even to firms that are not party to them.
- Abides by every law and regulation but does not grant workers more benefits than those mandated by law, regulation or (if applicable) collective bargaining agreements.

LABOR MARKET REGULATION

What are the details?

The data reported here for Russian Federation are based on a detailed survey of labor market regulation that is completed by local lawyers and public officials.

Employment laws and regulations as well as secondary sources are reviewed to ensure accuracy.

Difficulty of hiring index

Difficulty of hiring covers 4 areas: (i) whether fixed-term contracts are prohibited for permanent tasks; (ii) the maximum cumulative duration of fixed-term contracts; (iii) the minimum wage for a cashier, age 19, with 1 year of work experience; and (iv) the ratio of the minimum

wage to the average value added per worker. The average value added per worker is the ratio of an economy's GNI per capita to the working-age population as a percentage of the total population.

Difficulty of hiring index	Moscow Data	Saint Petersburg Data
Fixed-term contracts prohibited for permanent tasks?	Yes	Yes
Maximum length of a single fixed-term contract (months)	60	60
Maximum length of fixed-term contracts, including renewals (months)	60	60
Minimum wage applicable to the worker assumed in the case study (US\$/month)	390.11	274.56
Ratio of minimum wage to value added per worker	0.24	0.17

Source: *Doing Business* database.

LABOR MARKET REGULATION

Rigidity of hours index

Rigidity of hours covers 7 areas: (i) whether the workweek can extend to 50 hours or more (including overtime) for 2 months in a year to respond to a seasonal increase in workload; (ii) the maximum number of days allowed in the workweek; (iii) the premium for night work (as a percentage of hourly pay); (iv) the premium for work on a weekly rest day (as a percentage of hourly pay); (v) whether there are restrictions on night work; (vi) whether there are restrictions on weekly holiday work; and (vii) the average paid annual leave for workers with 1 year of tenure, 5 years of tenure and 10 years of tenure.

Rigidity of hours index	Moscow Data	Saint Petersburg Data
50-hour workweek allowed for 2 months a year in case of a seasonal increase in workload?	Yes	Yes
Maximum working days per week	6.0	6.0
Premium for night work (% of hourly pay)	20%	20%
Premium for work on weekly rest day (% of hourly pay)	100%	100%
Major restrictions on night work?	No	No
Major restrictions on weekly holiday?	Yes	Yes
Paid annual leave for a worker with 1 year of tenure (in working days)	22.0	22.0
Paid annual leave for a worker with 5 years of tenure (in working days)	22.0	22.0
Paid annual leave for a worker with 10 years of tenure (in working days)	22.0	22.0
Paid annual leave (average for workers with 1, 5 and 10 years of tenure, in working days)	22.0	22.0

Source: Doing Business database.

LABOR MARKET REGULATION

Difficulty of redundancy index

Difficulty of redundancy index looks at 9 questions: (i) what the length is in months of the maximum probationary period; (ii) whether redundancy is disallowed as a basis for terminating workers; (iii) whether the employer needs to notify a third party (such as a government agency) to terminate 1 redundant worker; (iv) whether the employer needs to notify a third party to terminate a group of 9 redundant workers; (v)

whether the employer needs approval from a third party to terminate 1 redundant worker; (vi) whether the employer needs approval from a third party to terminate a group of 9 redundant workers; (vii) whether the law requires the employer to reassign or retrain a worker before making the worker redundant; (viii) whether priority rules apply for redundancies; and (ix) whether priority rules apply for reemployment.

Difficulty of redundancy index	Moscow Data	Saint Petersburg Data
Maximum length of probationary period (months)	3.0	3.0
Dismissal due to redundancy allowed by law?	Yes	Yes
Third-party notification if 1 worker is dismissed?	Yes	Yes
Third-party approval if 1 worker is dismissed?	No	No
Third-party notification if 9 workers are dismissed?	Yes	Yes
Third-party approval if 9 workers are dismissed?	No	No
Retraining or reassignment obligation before redundancy?	Yes	Yes
Priority rules for redundancies?	Yes	Yes
Priority rules for reemployment?	No	No

Source: Doing Business database.

LABOR MARKET REGULATION

Redundancy cost

Redundancy cost measures the cost of advance notice requirements, severance payments and penalties due when terminating a redundant worker, expressed in weeks of salary. The average value of notice

requirements and severance payments applicable to a worker with 1 year of tenure, a worker with 5 years and a worker with 10 years is considered. One month is recorded as 4 and 1/3 weeks.

Redundancy cost indicator (in salary weeks)	Moscow Data	Saint Petersburg Data
Notice period for redundancy dismissal for a worker with 1 year of tenure	8.7	8.7
Notice period for redundancy dismissal for a worker with 5 years of tenure	8.7	8.7
Notice period for redundancy dismissal for a worker with 10 years of tenure	8.7	8.7
Notice period for redundancy dismissal (average for workers with 1, 5 and 10 years of tenure)	8.7	8.7
Severance pay for redundancy dismissal for a worker with 1 year of tenure	8.7	8.7
Severance pay for redundancy dismissal for a worker with 5 years of tenure	8.7	8.7
Severance pay for redundancy dismissal for a worker with 10 years of tenure	8.7	8.7
Severance pay for redundancy dismissal (average for workers with 1, 5 and 10 years of tenure)	8.7	8.7

Source: *Doing Business* database.

Social protection schemes and benefits & Labor disputes

Doing Business collects data on the existence of unemployment protection schemes as well as data on whether employers are legally required to provide health insurance for employees with permanent contracts.

Doing Business also assesses the mechanisms available to resolve labor disputes. More specifically, it collects data on what courts would be competent to hear labor disputes and whether the competent court is specialized in resolving labor disputes.

Social protection schemes and benefits & Labor disputes indicator	Moscow Data	Saint Petersburg Data
Availability of unemployment protection scheme?	Yes	Yes
Health insurance existing for permanent employees?	Yes	Yes
Availability of courts or court sections specializing in labor disputes?	No	No

DISTANCE TO FRONTIER AND EASE OF DOING BUSINESS RANKING

This year's report presents results for 2 aggregate measures: the distance to frontier score and the ease of doing business ranking, which for the first time this year is based on the distance to frontier score. The ease of doing business ranking compares economies with one another; the distance to frontier score benchmarks economies with respect to regulatory best practice, showing the absolute distance to the best performance on each *Doing Business* indicator. When compared across years, the distance to frontier score shows how much the regulatory environment for local entrepreneurs in an economy has changed over time in absolute terms, while the ease of doing business ranking can show only how much the regulatory environment has changed relative to that in other economies.

Distance to Frontier

The distance to frontier score captures the gap between an economy's performance and a measure of best practice across the entire sample of 31 indicators for 10 *Doing Business* topics (the labor market regulation indicators are excluded). For starting a business, for example, Canada and New Zealand have the smallest number of procedures required (1), and New Zealand the shortest time to fulfill them (0.5 days). Slovenia has the lowest cost (0.0), and Australia, Colombia and 110 other economies have no paid-in minimum capital requirement (table 15.1 in the *Doing Business 2015* report).

Calculation of the distance to frontier score

Calculating the distance to frontier score for each economy involves 2 main steps. First, individual component indicators are normalized to a common unit where each of the 31 component indicators y (except for the total tax rate) is rescaled using the linear transformation $(\text{worst} - y)/(\text{worst} - \text{frontier})$. In this formulation the frontier represents the best performance on the indicator across all economies since 2005 or the third year after data for the indicator were collected for the first time. For legal indicators such as those on getting credit or protecting minority investors, the frontier is set at the highest possible value. For the total tax rate, consistent with the use of a threshold in calculating the rankings on this indicator, the frontier is

defined as the total tax rate at the 15th percentile of the overall distribution for all years included in the analysis. For the time to pay taxes the frontier is defined as the lowest time recorded among all economies that levy the 3 major taxes: profit tax, labor taxes and mandatory contributions, and value added tax (VAT) or sales tax. In addition, the cost to export and cost to import for each year are divided by the GDP deflator, to take the general price level into account when benchmarking these absolute-cost indicators across economies with different inflation trends. The base year for the deflator is 2013 for all economies.

In the same formulation, to mitigate the effects of extreme outliers in the distributions of the rescaled data for most component indicators (very few economies need 700 days to complete the procedures to start a business, but many need 9 days), the worst performance is calculated after the removal of outliers. The definition of outliers is based on the distribution for each component indicator. To simplify the process, 2 rules were defined: the 95th percentile is used for the indicators with the most dispersed distributions (including time, cost, minimum capital and number of payments to pay taxes), and the 99th percentile is used for number of procedures and number of documents to trade. No outlier was removed for component indicators bound by definition or construction, including legal index scores (such as the depth of credit information index, extent of conflict of interest regulation index and strength of insolvency framework index) and the recovery rate (figure 15.1 in the *Doing Business 2015* report).

Second, for each economy the scores obtained for individual indicators are aggregated through simple averaging into one distance to frontier score, first for each topic and then across all 10 topics: starting a business, dealing with construction permits, getting electricity, registering property, getting credit, protecting minority investors, paying taxes, trading across borders, enforcing contracts and resolving insolvency. More complex aggregation methods—such as principal components and unobserved components—yield a ranking nearly identical to the simple average used by *Doing Business*⁶. Thus *Doing Business* uses the simplest

⁶ See Djankov, Manraj and others (2005). Principal components and unobserved components methods yield a ranking nearly identical to

method: weighting all topics equally and, within each topic, giving equal weight to each of the topic components⁷.

An economy's distance to frontier score is indicated on a scale from 0 to 100, where 0 represents the worst performance and 100 the frontier. All distance to frontier calculations are based on a maximum of 5 decimals. However, indicator ranking calculations and the ease of doing business ranking calculations are based on 2 decimals. The difference between an economy's distance to frontier score in any previous year and its score in 2014 illustrates the extent to which the economy has closed the gap to the regulatory frontier over time. And in any given year the score measures how far an economy is from the best performance at that time.

Treatment of the total tax rate

This year, for the first time, the total tax rate component of the paying taxes indicator set enters the distance to frontier calculation in a different way than any other indicator. The distance to frontier score obtained for the total tax rate is transformed in a nonlinear fashion before it enters the distance to frontier score for paying taxes. As a result of the nonlinear transformation, an increase in the total tax rate has a smaller impact on the distance to frontier score for the total tax rate—and therefore on the distance to frontier score for paying taxes—for economies with a below-average total tax rate than it would have in the calculation done in previous years (line B is smaller than line A in figure 15.2 of the *Doing Business 2015* report). And for economies with an extreme total tax rate (a rate that is very high relative to the average), an increase has a greater impact on both these distance to frontier scores than before (line D is bigger than line C in figure 15.2 of the *Doing Business 2015* report).

The nonlinear transformation is not based on any economic theory of an "optimal tax rate" that minimizes distortions or maximizes efficiency in an economy's

that from the simple average method because both these methods assign roughly equal weights to the topics, since the pairwise correlations among indicators do not differ much. An alternative to the simple average method is to give different weights to the topics, depending on which are considered of more or less importance in the context of a specific economy.

⁷ For getting credit, indicators are weighted proportionally, according to their contribution to the total score, with a weight of 60% assigned to the strength of legal rights index and 40% to the depth of credit information index. Indicators for all other topics are assigned equal weights

overall tax system. Instead, it is mainly empirical in nature. The nonlinear transformation along with the threshold reduces the bias in the indicator toward economies that do not need to levy significant taxes on companies like the *Doing Business* standardized case study company because they raise public revenue in other ways—for example, through taxes on foreign companies, through taxes on sectors other than manufacturing or from natural resources (all of which are outside the scope of the methodology). In addition, it acknowledges the need of economies to collect taxes from firms.

Calculation of scores for economies with 2 cities covered

For each of the 11 economies for which a second city was added in this year's report, the distance to frontier score is calculated as the population-weighted average of the distance to frontier scores for the 2 cities covered (table 12.1). This is done for the aggregate score, the scores for each topic and the scores for all the component indicators for each topic.

Table 12.1 Weights used in calculating the distance to frontier scores for economies with 2 cities covered

Economy	City	Weight (%)
Bangladesh	Dhaka	78
	Chittagong	22
Brazil	São Paulo	61
	Rio de Janeiro	39
China	Shanghai	55
	Beijing	45
India	Mumbai	47
	Delhi	53
Indonesia	Jakarta	78
	Surabaya	22
Japan	Tokyo	65
	Osaka	35
Mexico	Mexico City	83
	Monterrey	17
Nigeria	Lagos	77
	Kano	23
Pakistan	Karachi	65
	Lahore	35
Russian Federation	Moscow	70
	St. Petersburg	30
United States	New York	60
	Los Angeles	40

Economies that improved the most across 3 or more *Doing Business* topics in 2013/14

Doing Business 2015 uses a simple method to calculate which economies improved the ease of doing business the most. First, it selects the economies that in 2013/14 implemented regulatory reforms making it easier to do business in 3 or more of the 10 topics included in this year's aggregate distance to frontier score. Twenty-one economies meet this criterion: Azerbaijan; Benin; the Democratic Republic of Congo; Côte d'Ivoire; the Czech Republic; Greece; India; Ireland; Kazakhstan; Lithuania; the former Yugoslav Republic of Macedonia; Poland; Senegal; the Seychelles; Spain; Switzerland; Taiwan, China; Tajikistan; Togo; Trinidad and Tobago; and the United Arab Emirates. Second, *Doing Business* sorts these economies on the increase in their distance to frontier score from the previous year using comparable data.

Selecting the economies that implemented regulatory reforms in at least 3 topics and had the biggest improvements in their distance to frontier scores is intended to highlight economies with ongoing, broad-based reform programs. The improvement in the distance to frontier score is used to identify the top improvers because this allows a focus on the absolute improvement—in contrast with the relative improvement shown by a change in rankings—that economies have made in their regulatory environment for business.

Ease of *Doing Business* ranking

The ease of doing business ranking ranges from 1 to 189. The ranking of economies is determined by sorting the aggregate distance to frontier scores, rounded to 2 decimals.
